| Immunogen                 |                                                                                                                                             |
| Specificity               | Flag-Tag Monoclonal Antibody(2C5) Cy5 Conjugated specially designed for your Immunofluorescence analysis.                                   |
| Formulation               | Liquid in PBS, pH 7.4, containing 0.02% sodium azide as preservative and 50% Glycerol.                                                      |
| Source                    | Monoclonal, Mouse IgG                                                                                                                       |
| Purification              | The antibody was affinity-purified from mouse ascites by affinity-chromatography using specific immunogen.                                  |
| Dilution                  | Optimal working dilutions should be determined experimentally by the investigator. Suggested starting dilutions are as follows: IF: 1:2000. |
| Concentration             | 1 mg/ml                                                                                                                                     |
| Purity                    | ≥90%                                                                                                                                        |
| Storage Stability         | -20°C/1 year                                                                                                                                |
| Synonyms                  | Flag                                                                                                                                        |
| Observed Band             |                                                                                                                                             |
