

# 14-3-3 $\gamma$ Monoclonal Antibody

Catalog No	BYmab-03657
Isotype	IgG
Reactivity	Human;Mouse;Rat
Applications	WB
Gene Name	YWHAG
Protein Name	14-3-3 protein gamma
Immunogen	The antiserum was produced against synthesized peptide derived from human 14-3-3 gamma. AA range:51-100
Specificity	14-3-3 $\gamma$ Monoclonal Antibody detects endogenous levels of 14-3-3 $\gamma$ protein.
Formulation	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.
Source	Monoclonal, Mouse,IgG
Purification	The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen.
Dilution	WB 1:500-2000
Concentration	1 mg/ml
Purity	$\geq 90\%$
Storage Stability	-20°C/1 year
Synonyms	YWHAG; 14-3-3 protein gamma; Protein kinase C inhibitor protein 1; KCIP-1
Observed Band	28kD
Cell Pathway	Cytoplasm .
Tissue Specificity	Highly expressed in brain, skeletal muscle, and heart.
Function	function:Adapter protein implicated in the regulation of a large spectrum of both general and specialized signaling pathway. Binds to a large number of partners, usually by recognition of a phosphoserine or phosphothreonine motif. Binding generally results in the modulation of the activity of the binding partner.,PTM:Phosphorylated by various PKC isozymes.,similarity:Belongs to the 14-3-3 family.,subunit:Homodimer. Interacts with RAF1, SSH1 and CRTC2/TORC2. Interacts with ABL1 (phosphorylated form); the interaction retains it in the cytoplasm.,tissue specificity:Highly expressed in brain, skeletal muscle, and heart.,

Nanjing BYabscience technology Co.,Ltd

## Background

This gene product belongs to the 14-3-3 family of proteins which mediate signal transduction by binding to phosphoserine-containing proteins. This highly conserved protein family is found in both plants and mammals, and this protein is 100% identical to the rat ortholog. It is induced by growth factors in human vascular smooth muscle cells, and is also highly expressed in skeletal and heart muscles, suggesting an important role for this protein in muscle tissue. It has been shown to interact with RAF1 and protein kinase C, proteins involved in various signal transduction pathways. [provided by RefSeq, Jul 2008],

## matters needing attention

Avoid repeated freezing and thawing!

## Usage suggestions

This product can be used in immunological reaction related experiments. For more information, please consult technical personnel.
