

MRP-L40 Monoclonal Antibody

Catalog No BYmab-03992 Isotype IgG Reactivity Human;Rat;Mouse; Applications WB Gene Name MRPL40 Protein Name 39S ribosomal protein L40 mitochondrial Immunogen The antiserum was produced against synthesized peptide derived from human MRPL40. AA range:101-150 Specificity MRP-L40 Monoclonal Antibody detects endogenous levels of MRP-L40 protein. Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Source Monoclonal, Mouse, IgG Purification The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-2000 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms MRPL40; NLVCF; URIM; 39S ribosomal protein L40; mitochondrial; L40mt; MRP-L40; Nuclear localization signal-containing protein deleted in velocardiofacial syndrome; Up-regulated in metastasis Observed Band 24kD Cell Pathway Mitochondrion. Tissue Specificity Ubiquitous. Function tissue specificity: Ubiquitous, onsi

Tissue Specificity Ubiquitous. Function tissue specificity:Ubiquitous., Mammalian mitochondrial ribosomal proteins are encoded by nuclear genes and help in protein synthesis within the mitochondrion. Mitochondrial ribosomes (mitoribosomes) consist of a small 228S subunit. They have an estimated 75% protein to rRNA composition compared to prokaryotic ribosomes, where this ratio is reversed. Another difference between mammalian	Catalog No	BYmab-03992
Applications Gene Name MRPL40 Protein Name 39S ribosomal protein L40 mitochondrial Immunogen The antiserum was produced against synthesized peptide derived from human MRPL40. AA range:101-150 Specificity MRP-L40 Monoclonal Antibody detects endogenous levels of MRP-L40 protein. Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Source Monoclonal, Mouse, IgG Purification The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-2000 Concentration 1 mg/ml Purity 290% Storage Stability -20°C/1 year Synonyms MRPL40; NLVCF; URIM; 39S ribosomal protein L40; mitochondrial; L40mt; MRP-L40; Nuclear localization signal-containing protein deleted in velocardiofacial syndrome; Up-regulated in metastasis Observed Band 24kD Cell Pathway Mitochondrion . Tissue Specificity Ubiquitous. Function Mammalian mitochondrial ribosomal proteins are encoded by nuclear genes and help in protein synthesis within the mitochondrion. Mitochondrial ribosomes (mitoribosomes) consist of a small 28S subunit. They have an estimated 75% protein to rRNA composition compared to prokaryotic ribosomes, where this ratio is reversed. 	Among different species, the proteins comprising the mitoribosome differ greatly in sequence, and sometimes in biochemical properties, which prevents easy recognition by sequence homology. This gene encodes a 39S subunit protein. Deletions in this gene may contribute to the etiology of velo-cardio-facial syndrome and DiGeorge syndrome. [provided by RefSeq, Jul 2008],
