

# GTSE1 Monoclonal Antibody

Catalog No	BYmab-05078
Isotype	IgG
Reactivity	Human;Rat;Mouse;
Applications	WB
Gene Name	GTSE1
Protein Name	G2 and S phase-expressed protein 1 (GTSE-1) (Protein B99 homolog)
Immunogen	Synthesized peptide derived from human protein . at AA range: 70-150
Specificity	GTSE1 Monoclonal Antibody detects endogenous levels of protein.
Formulation	Liquid in PBS containing 50% glycerol, and 0.02% sodium azide.
Source	Monoclonal, Mouse,IgG
Purification	The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen.
Dilution	WB 1:500-2000
Concentration	1 mg/ml
Purity	≥90%
Storage Stability	-20°C/1 year
Synonyms	
Observed Band	79kD
Cell Pathway	Cytoplasm, cytoskeleton. Associated with microtubules.
Tissue Specificity	Brain,Epithelium,Liver,Muscle,Placenta,
Function	developmental stage:Expressed in G2/M phase. Not detected in quiescent cells.,function:May be involved in p53-induced cell cycle arrest in G2/M phase by interfering with microtubule rearrangements that are required to enter mitosis. Overexpression delays G2/M phase progression.,PTM:Phosphorylated in mitosis.,subcellular location:Associated with microtubules.,
Background	The protein encoded by this gene is only expressed in the S and G2 phases of the cell cycle, where it colocalizes with cytoplasmic tubulin and microtubules. In response to DNA damage, the encoded protein accumulates in the nucleus and binds the tumor suppressor protein p53, shuttling it out of the nucleus and repressing its ability to induce apoptosis.
