

RND2 Monoclonal Antibody

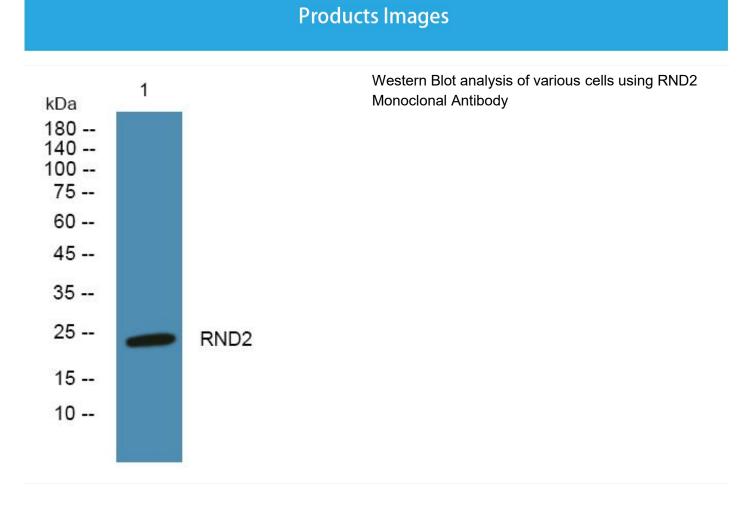

| Catalog No BYmab-06101 Isotype IgG Reactivity Human;Mouse Applications WB Gene Name RND2 ARHN RHO7 Protein Name Rho-related GTP-binding protein Rho7 (Rnd2) Immunogen Synthesized peptide derived from human protein . at AA range: 140-220 Specificity RND2 Monoclonal Antibody detects endogenous levels of protein. Formulation Liquid in PBS containing 50% glycerol, and 0.02% sodium azide. Source Monoclonal, Mouse, IgG Purification The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-2000 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms Observed Band 24kD Cell Pathway Cytoplasmic vesicle, secretory vesicle, acrosome membrane; Lipid-anchor; Cytoplasmic side. Colocalizes with RACGAP1 in Golgi-derived proacrosomal vesicles and the acrosome. Tissue Specificity Highly expressed in testis. Function function:May be specifically involved in neuronal and hepatic functions. Is a C3 toxin-insensitive member of the Rho subfamily, similarity; | | |
|--|--------------------|--|
| Applications WB Gene Name RND2 ARHN RHO7 Protein Name Rho-related GTP-binding protein RhoN (Rho family GTPase 2) (Rho-related GTP-binding protein Rho7) (Rnd2) Immunogen Synthesized peptide derived from human protein . at AA range: 140-220 Specificity RND2 Monoclonal Antibody detects endogenous levels of protein. Formulation Liquid in PBS containing 50% glycerol, and 0.02% sodium azide. Source Monoclonal, Mouse, IgG Purification The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-2000 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms Observed Band 24kD Cell Pathway Cytoplasmic vesicle, secretory vesicle, acrosome membrane; Lipid-anchor; Cytoplasmic side. Colocalizes with RACGAP1 in Golgi-derived proacrosomal vesicles and the acrosome Tissue Specificity Highly expressed in testis. Function function:May be specifically involved in neuronal and hepatic functions. Is a C3 toxin-insensitive member of the Rho subfamily, similarity Belongs to the small GTPase superfamily. Rho family, subcellular location:Colocalizes with RACGAP1 in Golgi-derived proacrosomal vesicles and the acrosome. Subunit:Interacts with the Rho-GAP domain of RACGAP1. Interacts with UBXD5_tissue specificity. Highly expressed in testis. Background This gene encodes a member of the Rho GTPase family, whose members play a key role in the regulation of actin cytoskeleton organization in response to extracellular growth factors. This particular family member has been implicated in | Catalog No | BYmab-06101 |
| Applications Gene Name RND2 ARHN RHO7 Protein Name Rho-related GTP-binding protein RhoN (Rho family GTPase 2) (Rho-related GTP-binding protein Rho7) (Rnd2) Immunogen Synthesized peptide derived from human protein . at AA range: 140-220 Specificity RND2 Monoclonal Antibody detects endogenous levels of protein. Formulation Liquid in PBS containing 50% glycerol, and 0.02% sodium azide. Source Monoclonal, Mouse, IgG Purification The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-2000 Concentration 1 mg/ml Purity 290% Storage Stability -20°C/1 year Synonyms Observed Band 24kD Cell Pathway Cytoplasmic vesicle, secretory vesicle, acrosome membrane; Lipid-anchor; Cytoplasmic side. Colocalizes with RACGAP1 in Golgi-derived proacrosomal vesicles and the acrosome. Tissue Specificity Highly expressed in testis. Function function:May be specifically involved in neuronal and hepatic functions. Is a C3 toxin-insensitive member of the Rho subfamily, similarity Belongs to the small GTPase superfamily. Rho family, subcellular location:Colocalizes with RACGAP1 in Golgi-derived proacrosomal vesicles and the acrosome. Subunit:Interacts with the Rho-GAP domain of RACGAP1. Interacts with UBXD5, tissue specificity-Highly expressed in testis. Background This gene encodes a member of the Rho GTPase family, whose members play a key role in the regulation of actin cytoskeleton organization in response to extracellular growth factors. This particular family member has been implicated in | Isotype | IgG |
| Gene Name RND2 ARHN RHO7 Protein Name Rho-related GTP-binding protein Rho7) (Rnd2) Immunogen Synthesized peptide derived from human protein . at AA range: 140-220 Specificity RND2 Monoclonal Antibody detects endogenous levels of protein. Formulation Liquid in PBS containing 50% glycerol, and 0.02% sodium azide. Source Monoclonal, Mouse, IgG Purification The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-2000 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms Observed Band 24kD Cell Pathway Cytoplasmic vesicle, secretory vesicle, acrosome membrane; Lipid-anchor; Cytoplasmic side. Colocalizes with RACGAP1 in Golgi-derived proacrosomal vesicles and the acrosome. Tissue Specificity Highly expressed in testis. Function function: May be specifically involved in neuronal and hepatic functions. Is a C3 toxin-insensitive member of the Rho subfamily, similarity: Belongs to the small GTPase superfamily. Rho family, subcellular location: Colocalizes with RACGAP1. Interacts with UBXD5. tissue specificity: Highly expressed in testis. Background This gene encodes a member of the Rho GT | Reactivity | Human;Mouse |
| Protein Name Rho-related GTP-binding protein RhoN (Rho family GTPase 2) (Rho-related GTP-binding protein Rho7) (Rnd2) Immunogen Synthesized peptide derived from human protein . at AA range: 140-220 Specificity RND2 Monoclonal Antibody detects endogenous levels of protein. Formulation Liquid in PBS containing 50% glycerol, and 0.02% sodium azide. Source Monoclonal, Mouse, IgG Purification The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-2000 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms Observed Band 24kD Cell Pathway Cytoplasmic vesicle, secretory vesicle, acrosome membrane; Lipid-anchor; Cytoplasmic side · Colocalizes with RACGAP1 in Golgi-derived proacrosomal vesicles and the acrosome. Tissue Specificity Highly expressed in testis. function:May be specifically involved in neuronal and hepatic functions. Is a C3 toxin-insensitive member of the Rho subfamily, similarity. Belongs to the small GTPase superfamily. Rho family, subcellular location:Colocalizes with RACGAP1 in Golgi-derived proacrosomal vesicles and the acrosome vesicles with RACGAP1 in Golgi-derived proacrosomal vesicles and the acrosome. Tissue Specificity Highly expressed in testis. Function This gene encodes a member of the Rho GTPase family, whose members play a key role in the regulation of actin cytoskeleton organization in response to extracellular growth factors. This particular family member has been implicated in | Applications | WB |
| Immunogen Synthesized peptide derived from human protein . at AA range: 140-220 Specificity RND2 Monoclonal Antibody detects endogenous levels of protein. Colocalizes with RACGAP1 in Golgi-derived proacrosomal vesicles and the acrosome. Tissue Specificity Highly expressed in testis. Function function: May be specifically involved in neuronal and hepatic functions. Is a C3 toxin-insensitive member of the Rho subfamily., similarity: Belongs to the small GTPase superfamily. Rho family., subcellular location: Colocalizes with RACGAP1 in Golgi-derived proacrosomal vesicles and the acrosome, subunit: Interacts with the Rho-GAP domain of RACGAP1. Interacts with UBXD5., tissue specificity: Highly expressed in testis. Background This gene encodes a member of the Rho GTPase family, whose members play a key role in the regulation of actin cytoskeleton organization in response to extracellular growth factors. This particular family member has been implicated in | Formulation | Liquid in PBS containing 50% glycerol, and 0.02% sodium azide. |
| affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-2000 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms Observed Band 24kD Cell Pathway Cytoplasmic vesicle, secretory vesicle, acrosome membrane; Lipid-anchor; Cytoplasmic side . Colocalizes with RACGAP1 in Golgi-derived proacrosomal vesicles and the acrosome. Tissue Specificity Highly expressed in testis. Function function:May be specifically involved in neuronal and hepatic functions. Is a C3 toxin-insensitive member of the Rho subfamily, similarity:Belongs to the small GTPase superfamily. Rho family, subcellular location:Colocalizes with RACGAP1 in Golgi-derived proacrosomal vesicles and the acrosome, subunit:Interacts with the Rho-GAP domain of RACGAP1. Interacts with UBXD5.,tissue specificity:Highly expressed in testis. Background This gene encodes a member of the Rho GTPase family, whose members play a key role in the regulation of actin cytoskeleton organization in response to extracellular growth factors. This particular family member has been implicated in | Source | Monoclonal, Mouse,IgG |
| Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms Observed Band 24kD Cell Pathway Cytoplasmic vesicle, secretory vesicle, acrosome membrane; Lipid-anchor; Cytoplasmic side. Colocalizes with RACGAP1 in Golgi-derived proacrosomal vesicles and the acrosome. Tissue Specificity Highly expressed in testis. Function function:May be specifically involved in neuronal and hepatic functions. Is a C3 toxin-insensitive member of the Rho subfamily.,similarity:Belongs to the small GTPase superfamily. Rho family.,subcellular location:Colocalizes with RACGAP1 in Golgi-derived proacrosomal vesicles and the acrosome.,subunit:Interacts with the Rho-GAP domain of RACGAP1. Interacts with UBXD5.,tissue specificity:Highly expressed in testis., Background This gene encodes a member of the Rho GTPase family, whose members play a key role in the regulation of actin cytoskeleton organization in response to extracellular growth factors. This particular family member has been implicated in | Purification | |
| Purity ≥90% Storage Stability -20°C/1 year Synonyms Observed Band 24kD Cell Pathway Cytoplasmic vesicle, secretory vesicle, acrosome membrane; Lipid-anchor; Cytoplasmic side . Colocalizes with RACGAP1 in Golgi-derived proacrosomal vesicles and the acrosome. Tissue Specificity Highly expressed in testis. Function function:May be specifically involved in neuronal and hepatic functions. Is a C3 toxin-insensitive member of the Rho subfamily.,similarity:Belongs to the small GTPase superfamily. Rho family.,subcellular location:Colocalizes with RACGAP1 in Golgi-derived proacrosomal vesicles and the acrosome.,subunit:Interacts with the Rho-GAP domain of RACGAP1. Interacts with UBXD5.,tissue specificity:Highly expressed in testis., Background This gene encodes a member of the Rho GTPase family, whose members play a key role in the regulation of actin cytoskeleton organization in response to extracellular growth factors. This particular family member has been implicated in | Dilution | WB 1:500-2000 |
| Synonyms Observed Band 24kD Cell Pathway Cytoplasmic vesicle, secretory vesicle, acrosome membrane; Lipid-anchor; Cytoplasmic side. Colocalizes with RACGAP1 in Golgi-derived proacrosomal vesicles and the acrosome. Tissue Specificity Highly expressed in testis. Function function:May be specifically involved in neuronal and hepatic functions. Is a C3 toxin-insensitive member of the Rho subfamily.,similarity:Belongs to the small GTPase superfamily. Rho family,.subcellular location:Colocalizes with RACGAP1 in Golgi-derived proacrosomal vesicles and the acrosome.,subunit:Interacts with the Rho-GAP domain of RACGAP1. Interacts with UBXD5.,tissue specificity:Highly expressed in testis. Background This gene encodes a member of the Rho GTPase family, whose members play a key role in the regulation of actin cytoskeleton organization in response to extracellular growth factors. This particular family member has been implicated in | Concentration | 1 mg/ml |
| Synonyms Observed Band 24kD Cell Pathway Cytoplasmic vesicle, secretory vesicle, acrosome membrane; Lipid-anchor; Cytoplasmic side. Colocalizes with RACGAP1 in Golgi-derived proacrosomal vesicles and the acrosome. Tissue Specificity Highly expressed in testis. Function function:May be specifically involved in neuronal and hepatic functions. Is a C3 toxin-insensitive member of the Rho subfamily.,similarity:Belongs to the small GTPase superfamily. Rho family.,subcellular location:Colocalizes with RACGAP1 in Golgi-derived proacrosomal vesicles and the acrosome.,subunit:Interacts with the Rho-GAP domain of RACGAP1. Interacts with UBXD5.,tissue specificity:Highly expressed in testis., Background This gene encodes a member of the Rho GTPase family, whose members play a key role in the regulation of actin cytoskeleton organization in response to extracellular growth factors. This particular family member has been implicated in | Purity | ≥90% |
| Observed Band Cell Pathway Cytoplasmic vesicle, secretory vesicle, acrosome membrane; Lipid-anchor; Cytoplasmic side. Colocalizes with RACGAP1 in Golgi-derived proacrosomal vesicles and the acrosome. Tissue Specificity Highly expressed in testis. Function function:May be specifically involved in neuronal and hepatic functions. Is a C3 toxin-insensitive member of the Rho subfamily.,similarity:Belongs to the small GTPase superfamily. Rho family.,subcellular location:Colocalizes with RACGAP1 in Golgi-derived proacrosomal vesicles and the acrosome.,subunit:Interacts with the Rho-GAP domain of RACGAP1. Interacts with UBXD5.,tissue specificity:Highly expressed in testis., Background This gene encodes a member of the Rho GTPase family, whose members play a key role in the regulation of actin cytoskeleton organization in response to extracellular growth factors. This particular family member has been implicated in | Storage Stability | -20°C/1 year |
| Cytoplasmic vesicle, secretory vesicle, acrosome membrane; Lipid-anchor; Cytoplasmic side. Colocalizes with RACGAP1 in Golgi-derived proacrosomal vesicles and the acrosome. Tissue Specificity Highly expressed in testis. Function function:May be specifically involved in neuronal and hepatic functions. Is a C3 toxin-insensitive member of the Rho subfamily.,similarity:Belongs to the small GTPase superfamily. Rho family.,subcellular location:Colocalizes with RACGAP1 in Golgi-derived proacrosomal vesicles and the acrosome.,subunit:Interacts with the Rho-GAP domain of RACGAP1. Interacts with UBXD5.,tissue specificity:Highly expressed in testis., This gene encodes a member of the Rho GTPase family, whose members play a key role in the regulation of actin cytoskeleton organization in response to extracellular growth factors. This particular family member has been implicated in | Synonyms | |
| Cytoplasmic side . Colocalizes with RACGAP1 in Golgi-derived proacrosomal vesicles and the acrosome Tissue Specificity Highly expressed in testis. Function function:May be specifically involved in neuronal and hepatic functions. Is a C3 toxin-insensitive member of the Rho subfamily.,similarity:Belongs to the small GTPase superfamily. Rho family.,subcellular location:Colocalizes with RACGAP1 in Golgi-derived proacrosomal vesicles and the acrosome.,subunit:Interacts with the Rho-GAP domain of RACGAP1. Interacts with UBXD5.,tissue specificity:Highly expressed in testis., Background This gene encodes a member of the Rho GTPase family, whose members play a key role in the regulation of actin cytoskeleton organization in response to extracellular growth factors. This particular family member has been implicated in | Observed Band | 24kD |
| Function function:May be specifically involved in neuronal and hepatic functions. Is a C3 toxin-insensitive member of the Rho subfamily.,similarity:Belongs to the small GTPase superfamily. Rho family.,subcellular location:Colocalizes with RACGAP1 in Golgi-derived proacrosomal vesicles and the acrosome.,subunit:Interacts with the Rho-GAP domain of RACGAP1. Interacts with UBXD5.,tissue specificity:Highly expressed in testis., Background This gene encodes a member of the Rho GTPase family, whose members play a key role in the regulation of actin cytoskeleton organization in response to extracellular growth factors. This particular family member has been implicated in | Cell Pathway | Cytoplasmic side . Colocalizes with RACGAP1 in Golgi-derived proacrosomal |
| toxin-insensitive member of the Rho subfamily.,similarity:Belongs to the small GTPase superfamily. Rho family.,subcellular location:Colocalizes with RACGAP1 in Golgi-derived proacrosomal vesicles and the acrosome.,subunit:Interacts with the Rho-GAP domain of RACGAP1. Interacts with UBXD5.,tissue specificity:Highly expressed in testis., Background This gene encodes a member of the Rho GTPase family, whose members play a key role in the regulation of actin cytoskeleton organization in response to extracellular growth factors. This particular family member has been implicated in | Tissue Specificity | Highly expressed in testis. |
| key role in the regulation of actin cytoskeleton organization in response to extracellular growth factors. This particular family member has been implicated in | Function | toxin-insensitive member of the Rho subfamily.,similarity:Belongs to the small GTPase superfamily.
