

# RM36 Monoclonal Antibody

Catalog No	BYmab-06583
Isotype	IgG
Reactivity	Human;Mouse
Applications	WB
Gene Name	MRPL36 BRIP1
Protein Name	39S ribosomal protein L36, mitochondrial (L36mt) (MRP-L36) (BRCA1-interacting protein 1)
Immunogen	Synthesized peptide derived from part region of human protein AA range: 1-50
Specificity	RM36 Monoclonal Antibody detects endogenous levels of protein.
Formulation	Liquid in PBS containing 50% glycerol, and 0.02% sodium azide.
Source	Monoclonal, Mouse,IgG
Purification	The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen.
Dilution	WB 1:500-2000
Concentration	1 mg/ml
Purity	≥90%
Storage Stability	-20°C/1 year
Synonyms	
Observed Band	11kD
Cell Pathway	Mitochondrion .
Tissue Specificity	Adrenal gland,Testis,
Function	function:Component of the large subunit of mitochondrial ribosome .,similarity:Belongs to the ribosomal protein L36P family.,
Background	Mammalian mitochondrial ribosomal proteins are encoded by nuclear genes and help in protein synthesis within the mitochondrion. Mitochondrial ribosomes (mitoribosomes) consist of a small 28S subunit and a large 39S subunit. They have an estimated 75% protein to rRNA composition compared to prokaryotic ribosomes, where this ratio is reversed. Another difference between mammalian mitoribosomes and prokaryotic ribosomes is that the latter contain a 5S rRNA. Among different species, the proteins comprising the mitoribosome differ greatly in sequence, and sometimes in biochemical properties, which prevents easy recognition by sequence homology. This gene encodes a 39S subunit protein. A

Nanjing BYabscience technology Co.,Ltd

pseudogene corresponding to this gene is found on chromosome 2p. [provided by RefSeq, Jul 2008],

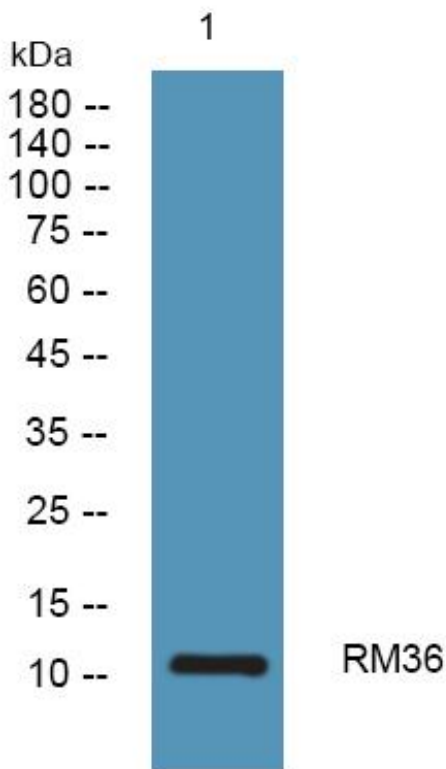

**matters needing attention**

Avoid repeated freezing and thawing!

**Usage suggestions**

This product can be used in immunological reaction related experiments. For more information, please consult technical personnel.
