

OR1K1 Monoclonal Antibody

Specificity OR1K1 Monoclon	
Reactivity Human;Rat;Mouse Applications WB Gene Name OR1K1 Protein Name Olfactory receptor Immunogen Synthesized pepti Specificity OR1K1 Monoclon	de derived from part region of human protein al Antibody detects endogenous levels of protein.
Applications Gene Name OR1K1 Protein Name Olfactory receptor Immunogen Specificity OR1K1 Monoclon	de derived from part region of human protein al Antibody detects endogenous levels of protein.
Gene Name OR1K1 Protein Name Olfactory receptor Immunogen Synthesized pepti Specificity OR1K1 Monoclon	de derived from part region of human protein al Antibody detects endogenous levels of protein.
Protein Name Olfactory receptor Immunogen Synthesized pepti Specificity OR1K1 Monoclon	de derived from part region of human protein al Antibody detects endogenous levels of protein.
Immunogen Synthesized pepti Specificity OR1K1 Monoclon	de derived from part region of human protein al Antibody detects endogenous levels of protein.
Specificity OR1K1 Monoclon	al Antibody detects endogenous levels of protein.
•	· ·
Formulation Liquid in PBS con	taining 50% glycerol, and 0.02% sodium azide.
Source Monoclonal, Mous	se,lgG
•	affinity-purified from mouse antiserum by raphy using epitope-specific immunogen.
Dilution WB 1:500-2000	
Concentration 1 mg/ml	
Purity ≥90%	
Storage Stability -20°C/1 year	
Synonyms	
Observed Band 34kD	
Cell Pathway Cell membrane; M	lulti-pass membrane protein.
Tissue Specificity	
Function function:Odorant r family.,	receptor .,similarity:Belongs to the G-protein coupled receptor 1
Olfactory receptor neuronal response proteins are members arising from single 7-transmembrane receptors and are transduction of ode	family 1 subfamily K member 1(OR1K1) Homo sapiens is interact with odorant molecules in the nose, to initiate a that triggers the perception of a smell. The olfactory receptor bers of a large family of G-protein-coupled receptors (GPCR) coding-exon genes. Olfactory receptors share a domain structure with many neurotransmitter and hormone responsible for the recognition and G protein-mediated orant signals. The olfactory receptor gene family is the largest in nomenclature assigned to the olfactory receptor genes and
