

B2LA1 Monoclonal Antibody

Catalog No	BYmab-07716
Isotype	IgG
Reactivity	Human;Mouse
Applications	WB
Gene Name	BCL2A1 BCL2L5 BFL1 GRS HBPA1
Protein Name	Bcl-2-related protein A1 (Bcl-2-like protein 5) (Bcl2-L-5) (Hemopoietic-specific early response protein) (Protein BFL-1) (Protein GRS)
Immunogen	Synthesized peptide derived from part region of human protein
Specificity	B2LA1 Monoclonal Antibody detects endogenous levels of protein.
Formulation	Liquid in PBS containing 50% glycerol, and 0.02% sodium azide.
Source	Monoclonal, Mouse,IgG
Purification	The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen.
Dilution	WB 1:500-2000
Concentration	1 mg/ml
Purity	≥90%
Storage Stability	-20°C/1 year
Synonyms	
Observed Band	19kD
Cell Pathway	Cytoplasm .
Tissue Specificity	Seems to be restricted to the hematopoietic compartment. Expressed in
	peripheral blood, spleen, and bone marrow, at moderate levels in lung, small intestine and testis, at a minimal levels in other tissues. Also found in vascular smooth muscle cells and hematopoietic malignancies.

tissues. Also found in vascular smooth muscle cells and hematopoietic malignancies., BCL2 related protein A1(BCL2A1) Homo sapiens This gene encodes a member of the BCL-2 protein family. The proteins of this family form hetero- or homodimers and act as anti- and pro-apoptotic regulators that are involved in a wide variety of cellular activities such as embryonic development, homeostasis and tumorigenesis. The protein encoded by this gene is able to reduce the release of pro-apoptotic cytochrome c from mitochondria and block caspase activation. This gene is a direct transcription target of NF-kappa B in response to inflammatory mediators, and is up-regulated by different extracellular signals, such as granulocyte-macrophage colony-stimulating factor (GM-CSF), CD40, phorbol ester and inflammatory cytokine TNF and IL-1, which suggests a cytoprotective function that is essential for lymphocyte activation as well as cell survival. Alternatively spliced transcript variants encoding different isoforms have **Background** survival. Alternatively spliced transcript variants encoding different isoforms have been found for this gene. [p matters needing Avoid repeated freezing and thawing!

attention

Usage suggestions

This product can be used in immunological reaction related experiments. For more information, please consult technical personnel.
