

LATS1 (phospho-Thr1079) mouse mAb

Catalog No BYmab-10375 Isotype IgG Reactivity Human;Mouse Applications WB Gene Name LATS1 WARTS Protein Name LATS1 (Thr1079) Immunogen Synthesized phosho peptide around human LATS1 (Thr1079) Specificity This antibody detects endogenous levels of Human Mouse LATS1 (phospho-Thr1079) Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium at Source Monoclonal, Mouse, IgG	
Reactivity Human; Mouse Applications WB Gene Name LATS1 WARTS Protein Name LATS1 (Thr1079) Immunogen Synthesized phosho peptide around human LATS1 (Thr1079) Specificity This antibody detects endogenous levels of Human Mouse LATS1 (phospho-Thr1079) Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium as Source Monoclonal, Mouse, IgG	
Applications WB Gene Name LATS1 WARTS Protein Name LATS1 (Thr1079) Immunogen Synthesized phosho peptide around human LATS1 (Thr1079) Specificity This antibody detects endogenous levels of Human Mouse LATS1 (phospho-Thr1079) Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium at Monoclonal, Mouse, IgG	
Gene Name LATS1 WARTS Protein Name LATS1 (Thr1079) Immunogen Synthesized phosho peptide around human LATS1 (Thr1079) Specificity This antibody detects endogenous levels of Human Mouse LATS1 (phospho-Thr1079) Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium at Monoclonal, Mouse, IgG	
Protein Name LATS1 (Thr1079) Immunogen Synthesized phosho peptide around human LATS1 (Thr1079) Specificity This antibody detects endogenous levels of Human Mouse LATS1 (phospho-Thr1079) Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium at Monoclonal, Mouse,IgG	
ImmunogenSynthesized phosho peptide around human LATS1 (Thr1079)SpecificityThis antibody detects endogenous levels of (phospho-Thr1079)FormulationLiquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium at Monoclonal, Mouse,lgG	
Specificity This antibody detects endogenous levels of Human Mouse LATS1 (phospho-Thr1079) Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium at Monoclonal, Mouse,IgG	
(phospho-Thr1079) Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium at Monoclonal, Mouse,IgG	
Source Monoclonal, Mouse,IgG	
5	azide.
Desiring The entitled was affinity purified from mayor entitions by	
Purification The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen.	
Dilution WB 1:500-2000	
Concentration 1 mg/ml	
Purity ≥90%	
Storage Stability -20°C/1 year	
Synonyms Serine/threonine-protein kinase LATS1 (EC 2.7.11.1) (Large tumor suphomolog 1) (WARTS protein kinase) (h-warts)	pressor
Observed Band 140kD	
Cytoplasm, cytoskeleton, microtubule organizing center, centrosome . cytoskeleton, spindle . Midbody . Cytoplasm, cytoskeleton, microtubule center, spindle pole body . Localizes to the centrosomes throughout into but migrates to the mitotic apparatus, including spindle pole bodies, mi spindle, and midbody, during mitosis	organizing terphase
Tissue Specificity Expressed in all adult tissues examined except for lung and kidney.

	Ser-909 and Thr-1079, which results in its activation. Phosphorylated upon DNA damage, probably by ATM or ATR.,similarity:Belongs to the protein kinase superfamily. AGC Ser/Thr protein kinase family.,similarity:Contains 1 AGC-kinase C-terminal domain.,similarity:Contains 1 protein kinase domain.,
Background	The protein encoded by this gene is a putative serine/threonine kinase that localizes to the mitotic apparatus and complexes with cell cycle controller CDC2 kinase in early mitosis. The protein is phosphorylated in a cell-cycle dependent manner, with late prophase phosphorylation remaining through metaphase. The N-terminal region of the protein binds CDC2 to form a complex showing reduced H1 histone kinase activity, indicating a role as a negative regulator of CDC2/cyclin A. In addition, the C-terminal kinase domain binds to its own N-terminal region, suggesting potential negative regulation through interference with complex formation via intramolecular binding. Biochemical and genetic data suggest a role as a tumor suppressor. This is supported by studies in knockout mice showing development of soft-tissue sarcomas, ovarian stromal cell tumors and a high sensitivity to carcinogenic treatmen
matters needing attention	Avoid repeated freezing and thawing!
Usage suggestions	This product can be used in immunological reaction related experiments. For more information, please consult technical personnel.
