<b>Function</b>	function:Possibly involved in plasma membrane-related signaling events.,similarity:Belongs to the small GTPase superfamily. Arf family.,subunit:Interacts with SYS1.,tissue specificity:Found in most tissues.,
<b>Background</b>	The protein encoded by this gene is a membrane-associated GTP-ase which localizes to the plasma membrane and is related to the ADP-ribosylation factor (ARF) and ARF-like (ARL) proteins. This gene plays a role in membrane trafficking between the trans-Golgi network and endosomes. Alternatively spliced transcript variants encoding different isoforms have been identified.
