

Fetuin-A mouse mAb

Catalog No BYmab-12486 Isotype IgG Reactivity Human;Rat;Mouse; Applications WB Gene Name AHSG FETUA PRO2743 Protein Name Fetuin-A Immunogen Synthesized peptide derived from human Fetuin-A Specificity This antibody detects endogenous levels of Human Fetuin-A Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Source Monoclonal, Mouse, IgG Purification The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-2000 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms Alpha-2-HS-glycoprotein (Alpha-2-Z-globulin;Ba-alpha-2-glycoprotein;Fetuin-A) [Cleaved into: Alpha-2-HS-glycoprotein chain A; Alpha-2-HS-glycoprotein chain B] Observed Band Synthesized in liver and selectively concentrated in bone matrix. Secreted in plasma. It is also found in denthin in much higher quantities than other plasma proteins. Function skeletal system development, ossification, acute inflammatory response, exet differentiation, gonad development, male gonad development, response to hormone		
Reactivity Human;Rat;Mouse; Applications WB Gene Name AHSG FETUA PRO2743 Protein Name Fetuin-A Immunogen Synthesized peptide derived from human Fetuin-A Specificity This antibody detects endogenous levels of Human Fetuin-A Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Source Monoclonal, Mouse,IgG Purification The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-2000 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms Alpha-2-HS-glycoprotein (Alpha-2-Z-globulin;Ba-alpha-2-glycoprotein;Fetuin-A) [Cleaved into: Alpha-2-HS-glycoprotein chain A; Alpha-2-HS-glycoprotein chain B] Observed Band Cell Pathway Secreted. Tissue Specificity Synthesized in liver and selectively concentrated in bone matrix. Secreted in plasma. It is also found in dentin in much higher quantities than other plasma proteins. Function skeletal system development, ossification, acute inflammatory response, reproductive developmental process, endocytosis, pinocytosis, defense response, inflammatory response so wounding, response to endogenous stimulus, response to hormone stimulus, negative regulation of signal transduction, response to organic substance, membrane invagination, negative regulation of organic substance.	Catalog No	BYmab-12486
Applications Gene Name AHSG FETUA PRO2743 Protein Name Fetuin-A Immunogen Synthesized peptide derived from human Fetuin-A Specificity This antibody detects endogenous levels of Human Fetuin-A Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Source Monoclonal, Mouse, IgG Purification The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-2000 Concentration 1 mg/ml Purity 290% Storage Stability -20°C/1 year Synonyms Alpha-2-HS-glycoprotein (Alpha-2-Z-globulin;Ba-alpha-2-glycoprotein;Fetuin-A) [Cleaved into: Alpha-2-HS-glycoprotein chain A; Alpha-2-HS-glycoprotein chain B] Observed Band Cell Pathway Secreted. Tissue Specificity Synthesized in liver and selectively concentrated in bone matrix. Secreted in plasma. It is also found in dentin in much higher quantities than other plasma proteins. Function skeletal system development, ossification, acute inflammatory response, reproductive developmental process, endocytosis, pinocytosis, defense response, inflammatory response sex differentiation, gonad development, male gonad development, response to wounding, response to endogenous stimulus, response to organic substance, membrane invagination, negative regulation of signal transduction, response to organic substance, membrane invagination, negative regulation of original transduction, response to organic substance, membrane invagination, negative regulation of original transduction, response to organic substance, membrane invagination, negative regulation of original transduction, response to organic substance, membrane invagination, negative regulation of original transduction, response to organic substance, membrane invagination, negative regulation of original transduction, response to organic substance, membrane invagination, negative regulation of original transduction, response to	Isotype	IgG

Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Source Monoclonal, Mouse, IgG Purification The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-2000 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms Alpha-2-HS-glycoprotein (Alpha-2-Z-globulin; Ba-alpha-2-glycoprotein; Fetuin-A) [Cleaved into: Alpha-2-HS-glycoprotein chain A; Alpha-2-HS-glycoprotein chain B] Observed Band Cell Pathway Secreted. Tissue Specificity Synthesized in liver and selectively concentrated in bone matrix. Secreted in plasma. It is also found in dentin in much higher quantities than other plasma proteins. Function skeletal system development, ossification, acute inflammatory response, reproductive developmental process, endocytosis, pinocytosis, defense response, acute-phase response, inflammatory response, sex differentiation, gonad development, male gonad development, response to wounding, response to endogenous stimulus, response to organic substance, membrane invagination, negative regulation of cell	Immunogen	Synthesized peptide derived from human Fetuin-A
Source Monoclonal, Mouse,IgG Purification The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-2000 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms Alpha-2-HS-glycoprotein (Alpha-2-Z-globulin;Ba-alpha-2-glycoprotein;Fetuin-A) [Cleaved into: Alpha-2-HS-glycoprotein chain A; Alpha-2-HS-glycoprotein chain B] Observed Band Secreted. Tissue Specificity Synthesized in liver and selectively concentrated in bone matrix. Secreted in plasma. It is also found in dentin in much higher quantities than other plasma proteins. Function skeletal system development, ossification, acute inflammatory response, exponse, reproductive developmental process, endocytosis, pinocytosis, defense response, acute-phase response, inflammatory response, ext differentiation, gonad development, male gonad development, response to wounding, response to endogenous stimulus, response to hormone stimulus, negative regulation of signal transduction, response to organic substance, membrane invagination, negative regulation of cell	Specificity	This antibody detects endogenous levels of Human Fetuin-A
Purification The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-2000 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms Alpha-2-HS-glycoprotein (Alpha-2-Z-globulin;Ba-alpha-2-glycoprotein;Fetuin-A) [Cleaved into: Alpha-2-HS-glycoprotein chain A; Alpha-2-HS-glycoprotein chain B] Observed Band Cell Pathway Secreted. Tissue Specificity Synthesized in liver and selectively concentrated in bone matrix. Secreted in plasma. It is also found in dentin in much higher quantities than other plasma proteins. Function skeletal system development, ossification, acute inflammatory response, reproductive developmental process, endocytosis, pinocytosis, defense response, acute-phase response, inflammatory response, sex differentiation, gonad development, male gonad development, response to wounding, response to endogenous stimulus, response to organic substance, membrane invagination, negative regulation of cell	Formulation	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.
affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-2000 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms Alpha-2-HS-glycoprotein (Alpha-2-Z-globulin;Ba-alpha-2-glycoprotein;Fetuin-A) [Cleaved into: Alpha-2-HS-glycoprotein chain A; Alpha-2-HS-glycoprotein chain B] Observed Band Cell Pathway Secreted. Tissue Specificity Synthesized in liver and selectively concentrated in bone matrix. Secreted in plasma. It is also found in dentin in much higher quantities than other plasma proteins. Function skeletal system development, ossification, acute inflammatory response, acute-phase response, inflammatory response, sex differentiation, gonad development, male gonad development, response to wounding, response to endogenous stimulus, response to hormone stimulus, negative regulation of signal transduction, response to organic substance, membrane invagination, negative regulation of cell	Source	Monoclonal, Mouse,IgG
Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms Alpha-2-HS-glycoprotein (Alpha-2-Z-globulin;Ba-alpha-2-glycoprotein;Fetuin-A) [Cleaved into: Alpha-2-HS-glycoprotein chain A; Alpha-2-HS-glycoprotein chain B] Observed Band Cell Pathway Secreted. Tissue Specificity Synthesized in liver and selectively concentrated in bone matrix. Secreted in plasma. It is also found in dentin in much higher quantities than other plasma proteins. Function skeletal system development, ossification, acute inflammatory response, reproductive developmental process, endocytosis, pinocytosis, defense response, acute-phase response, inflammatory response, sex differentiation, gonad development, male gonad development, response to wounding, response to endogenous stimulus, response to hormone stimulus, negative regulation of signal transduction, response to organic substance, membrane invagination, negative regulation of cell	Purification	
Purity ≥90% Storage Stability -20°C/1 year Synonyms Alpha-2-HS-glycoprotein (Alpha-2-Z-globulin;Ba-alpha-2-glycoprotein;Fetuin-A) [Cleaved into: Alpha-2-HS-glycoprotein chain A; Alpha-2-HS-glycoprotein chain B] Observed Band Cell Pathway Secreted. Tissue Specificity Synthesized in liver and selectively concentrated in bone matrix. Secreted in plasma. It is also found in dentin in much higher quantities than other plasma proteins. Function skeletal system development, ossification, acute inflammatory response, reproductive developmental process, endocytosis, pinocytosis, defense response, acute-phase response, inflammatory response, sex differentiation, gonad development, male gonad development, response to wounding, response to endogenous stimulus, response to hormone stimulus, negative regulation of signal transduction, response to organic substance, membrane invagination, negative regulation of cell	Dilution	WB 1:500-2000
Storage Stability -20°C/1 year Alpha-2-HS-glycoprotein (Alpha-2-Z-globulin;Ba-alpha-2-glycoprotein;Fetuin-A) [Cleaved into: Alpha-2-HS-glycoprotein chain A; Alpha-2-HS-glycoprotein chain B] Observed Band Cell Pathway Secreted. Synthesized in liver and selectively concentrated in bone matrix. Secreted in plasma. It is also found in dentin in much higher quantities than other plasma proteins. Function skeletal system development, ossification, acute inflammatory response, reproductive developmental process, endocytosis, pinocytosis, defense response, acute-phase response, inflammatory response, sex differentiation, gonad development, male gonad development, response to wounding, response to endogenous stimulus, response to hormone stimulus, negative regulation of signal transduction, response to organic substance, membrane invagination, negative regulation of cell	Concentration	1 mg/ml
Synonyms Alpha-2-HS-glycoprotein (Alpha-2-Z-globulin;Ba-alpha-2-glycoprotein;Fetuin-A) [Cleaved into: Alpha-2-HS-glycoprotein chain A; Alpha-2-HS-glycoprotein chain B] Observed Band Cell Pathway Secreted. Tissue Specificity Synthesized in liver and selectively concentrated in bone matrix. Secreted in plasma. It is also found in dentin in much higher quantities than other plasma proteins. Function skeletal system development, ossification, acute inflammatory response, reproductive developmental process, endocytosis, pinocytosis, defense response, acute-phase response, inflammatory response, sex differentiation, gonad development, male gonad development, response to wounding, response to endogenous stimulus, response to hormone stimulus, negative regulation of signal transduction, response to organic substance, membrane invagination, negative regulation of cell	Purity	≥90%
[Cleaved into: Alpha-2-HS-glycoprotein chain A; Alpha-2-HS-glycoprotein chain B] Observed Band Cell Pathway Secreted. Synthesized in liver and selectively concentrated in bone matrix. Secreted in plasma. It is also found in dentin in much higher quantities than other plasma proteins. Function skeletal system development, ossification, acute inflammatory response, reproductive developmental process, endocytosis, pinocytosis, defense response, acute-phase response, inflammatory response, sex differentiation, gonad development, male gonad development, response to wounding, response to endogenous stimulus, response to hormone stimulus, negative regulation of signal transduction, response to organic substance, membrane invagination,negative regulation of cell	Storage Stability	-20°C/1 year
Cell Pathway Secreted. Tissue Specificity Synthesized in liver and selectively concentrated in bone matrix. Secreted in plasma. It is also found in dentin in much higher quantities than other plasma proteins. Function skeletal system development, ossification, acute inflammatory response, reproductive developmental process, endocytosis, pinocytosis, defense response, acute-phase response, inflammatory response, sex differentiation, gonad development, male gonad development, response to wounding, response to endogenous stimulus, response to hormone stimulus, negative regulation of signal transduction, response to organic substance, membrane invagination,negative regulation of cell	Synonyms	[Cleaved into: Alpha-2-HS-glycoprotein chain A; Alpha-2-HS-glycoprotein chain
Tissue Specificity Synthesized in liver and selectively concentrated in bone matrix. Secreted in plasma. It is also found in dentin in much higher quantities than other plasma proteins. Function skeletal system development, ossification, acute inflammatory response, reproductive developmental process, endocytosis, pinocytosis, defense response, acute-phase response, inflammatory response, sex differentiation, gonad development, male gonad development, response to wounding, response to endogenous stimulus, response to hormone stimulus, negative regulation of signal transduction, response to organic substance, membrane invagination, negative regulation of cell	Observed Band	
plasma. It is also found in dentin in much higher quantities than other plasma proteins. Function skeletal system development, ossification, acute inflammatory response, reproductive developmental process, endocytosis, pinocytosis, defense response, acute-phase response, inflammatory response, sex differentiation, gonad development, male gonad development, response to wounding, response to endogenous stimulus, response to hormone stimulus, negative regulation of signal transduction, response to organic substance, membrane invagination, negative regulation of cell	Cell Pathway	Secreted.
response, reproductive developmental process, endocytosis, pinocytosis, defense response, acute-phase response, inflammatory response, sex differentiation, gonad development, male gonad development, response to wounding, response to endogenous stimulus, response to hormone stimulus, negative regulation of signal transduction, response to organic substance, membrane invagination, negative regulation of cell	Tissue Specificity	plasma. It is also found in dentin in much higher quantities than other plasma
	Function	response, reproductive developmental process, endocytosis, pinocytosis, defense response, acute-phase response, inflammatory response, sex differentiation, gonad development, male gonad development, response to wounding, response to endogenous stimulus, response to hormone stimulus, negative regulation of signal transduction, response to organic substance, membrane invagination, negative regulation of cell

Nanjing BYabscience technology Co.,Ltd

国内优质抗体供应商 精准的 WB 检测服务 24H 在线服务,欢迎咨询

	transport, telencephalon development, pallium development, cerebral cortex development, regulation of endocytosis, regulation of ossification,negative regulation of ossification, regulation of bone mineralization, forebrain development, regulation of response to external stimulus, regulation of homeostatic process, positive regula
Background	function:Promotes endocytosis, possesses opsonic properties and influences the mineral phase of bone. Shows affinity for calcium and barium ions.,polymorphism:There are two common alleles, AHSG*1 and AHSG*2. AHSG*1 has Thr-248/Thr-256; AHSG*2 has Met-248/Ser-256.,similarity:Belongs to the fetuin family.,similarity:Contains 2 cystatin domains.,subunit:Alpha-2-HS glycoprotein derives from this precursor, when the connecting peptide is cleaved off. The two chains A and B are held together by a single disulfide bond.,tissue specificity:Synthesized in liver and selectively concentrated in bone matrix. Secrete din plasma. It is also found in dentin in much higher quantities than other plasma proteins.,
matters needing attention	Avoid repeated freezing and thawing!
Usage suggestions	This product can be used in immunological reaction related experiments. For more information, please consult technical personnel.
