

## CARD 6 Monoclonal Antibody

Catalog No         BYmab-12696           Isotype         IgG           Reactivity         Human;           Applications         WB           Gene Name         CARD6           Protein Name         Caspase recruitment domain-containing protein 6           Immunogen         The antiserum was produced against synthesized peptide derived from human CARD6. AA range:1-50           Specificity         CARD 6 Monoclonal Antibody detects endogenous levels of CARD 6 protein.           Formulation         Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.           Source         Monoclonal, Mouse,IgG           Purification         The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen.           Dilution         WB 1:500-2000           Concentration         1 mg/ml           Purity         ≥90%           Storage Stability         -20°C/1 year           Synonyms         CARD6; Caspase recruitment domain-containing protein 6           Observed Band         116kD           Cell Pathway         Tissue Specificity         Aorta endothelial cell,Colon,Epithelium,Skeletal muscle,           Function         function:May be involved in apoptosis, similarity:Contains 1 CARD domain, (CARD), an antiparallel six-helical bundle that mediates homotypic protein-protein interactions. The encoded pro		
Reactivity Human; Applications WB  Gene Name CARD6  Protein Name Caspase recruitment domain-containing protein 6  Immunogen The antiserum was produced against synthesized peptide derived from human CARD6. AA range:1-50  Specificity CARD 6 Monoclonal Antibody detects endogenous levels of CARD 6 protein.  Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.  Source Monoclonal, Mouse,IgG  Purification The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen.  Dilution WB 1:500-2000  Concentration 1 mg/ml  Purity ≥90%  Storage Stability -20°C/1 year  Synonyms CARD6; Caspase recruitment domain-containing protein 6  Observed Band 116kD  Cell Pathway  Tissue Specificity Aorta endothelial cell,Colon,Epithelium,Skeletal muscle, Function function:May be involved in apoptosis,,similarity:Contains 1 CARD domain,  CARD0, an antiparallel six-helical bundle that mediates homotypic protein-protein interactions. The encoded protein is a microtubule-associated protein protein interactions. The encoded protein is a microtubule-associated protein in sea microtubule-associated protein that has been shown to interact with receptor-interacting protein on editivation of the inducible	Catalog No	BYmab-12696
Applications  WB  Gene Name  CARD6  Protein Name  Caspase recruitment domain-containing protein 6  Immunogen  The antiserum was produced against synthesized peptide derived from human CARD6. AA range:1-50  Specificity  CARD 6 Monoclonal Antibody detects endogenous levels of CARD 6 protein.  Formulation  Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.  Source  Monoclonal, Mouse, IgG  Purification  The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen.  Dilution  WB 1:500-2000  Concentration  1 mg/ml  Purity  ≥90%  Storage Stability  -20°C/1 year  Synonyms  CARD6; Caspase recruitment domain-containing protein 6  Observed Band  116kD  Cell Pathway  Tissue Specificity  Aorta endothelial cell, Colon, Epithelium, Skeletal muscle,  Function  function: May be involved in apoptosis., similarity: Contains 1 CARD domain.,  This gene encodes a protein that contains a caspase recruitment domain (CARD), an antiparallel six-helical bundle that mediates homotypic protein-protein interactions. The encoded protein is a microtubule-associated protein froducble en shown to interact with receptor-interacting protein kinases and positively modulate signal transduction pathways converging on activation of the inducble	Isotype	IgG
Gene Name CARD6 Protein Name Caspase recruitment domain-containing protein 6  Immunogen The antiserum was produced against synthesized peptide derived from human CARD6. AA range:1-50 Specificity CARD 6 Monoclonal Antibody detects endogenous levels of CARD 6 protein.  Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Source Monoclonal, Mouse,IgG Purification The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen.  Dilution WB 1:500-2000 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms CARD6; Caspase recruitment domain-containing protein 6  Observed Band 116kD  Cell Pathway Tissue Specificity Aorta endothelial cell,Colon,Epithelium,Skeletal muscle, Function function:May be involved in apoptosis.,similarity:Contains 1 CARD domain., This gene encodes a protein that contains a caspase recruitment domain (CARD), an antiparallel six-helical bundle that mediates homotypic protein-protein interactions. The encoded protein is a microtubule-associated protein that has been shown to interact with receptor-interacting protein kinases and positively modulate signal transduction pathways converging on a activation of the inducible	Reactivity	Human;
Protein Name Caspase recruitment domain-containing protein 6  Immunogen The antiserum was produced against synthesized peptide derived from human CARD6. AA range:1-50  Specificity CARD 6 Monoclonal Antibody detects endogenous levels of CARD 6 protein.  Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.  Source Monoclonal, Mouse,lgG  Purification The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen.  Dilution WB 1:500-2000  Concentration 1 mg/ml  Purity ≥90% Storage Stability -20°C/1 year  Synonyms CARD6; Caspase recruitment domain-containing protein 6  Observed Band 116kD  Cell Pathway  Tissue Specificity Aorta endothelial cell,Colon,Epithelium,Skeletal muscle, Function function:May be involved in apoptosis.,similarity:Contains 1 CARD domain.,  This gene encodes a protein that contains a caspase recruitment domain (CARD), an antiparallel six-helical bundle that mediates homotypic protein-protein interactions. The encoded protein is a microtubule-associated protein that has been shown to interact with receptor-interacting protein kinases and positively modulate signal transduction pathways converging on activation of the inducible	Applications	WB
Immunogen  The antiserum was produced against synthesized peptide derived from human CARD6. AA range:1-50  Specificity  CARD 6 Monoclonal Antibody detects endogenous levels of CARD 6 protein. Dilution       WB 1:500-2000         Concentration       1 mg/ml         Purity       ≥90%         Storage Stability       -20°C/1 year         Synonyms       CARD6; Caspase recruitment domain-containing protein 6         Observed Band       116kD         Cell Pathway       Aorta endothelial cell,Colon,Epithelium,Skeletal muscle,         Function       function:May be involved in apoptosis.,similarity:Contains 1 CARD domain.,         Background       This gene encodes a protein that contains a caspase recruitment domain (CARD), an antiparallel six-helical bundle that mediates homotypic protein-protein interactions. The encoded protein is a microtubule-associated protein that has been shown to interact with receptor-interacting protein kinases and positively modulate signal transduction pathways converging on activation of the inducible	Specificity	CARD 6 Monoclonal Antibody detects endogenous levels of CARD 6 protein.
Purification  The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen.  Dilution  WB 1:500-2000  Concentration  1 mg/ml  Purity  ≥90%  Storage Stability  -20°C/1 year  Synonyms  CARD6; Caspase recruitment domain-containing protein 6  Observed Band  116kD  Cell Pathway  Tissue Specificity  Aorta endothelial cell,Colon,Epithelium,Skeletal muscle,  Function  function:May be involved in apoptosis.,similarity:Contains 1 CARD domain.,  Background  This gene encodes a protein that contains a caspase recruitment domain (CARD), an antiparallel six-helical bundle that mediates homotypic protein-protein interactions. The encoded protein is a microtubule-associated protein that has been shown to interact with receptor-interacting protein kinases and positively modulate signal transduction pathways converging on activation of the inducible	Formulation	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.
affinity-chromatography using epitope-specific immunogen.  Dilution WB 1:500-2000  Concentration 1 mg/ml  Purity ≥90%  Storage Stability -20°C/1 year  Synonyms CARD6; Caspase recruitment domain-containing protein 6  Observed Band 116kD  Cell Pathway  Tissue Specificity Aorta endothelial cell,Colon,Epithelium,Skeletal muscle,  Function function:May be involved in apoptosis.,similarity:Contains 1 CARD domain.,  Background This gene encodes a protein that contains a caspase recruitment domain (CARD), an antiparallel six-helical bundle that mediates homotypic protein-protein interactions. The encoded protein is a microtubule-associated protein that has been shown to interact with receptor-interacting protein kinases and positively modulate signal transduction pathways converging on activation of the inducible	Source	Monoclonal, Mouse,IgG
Concentration       1 mg/ml         Purity       ≥90%         Storage Stability       -20°C/1 year         Synonyms       CARD6; Caspase recruitment domain-containing protein 6         Observed Band       116kD         Cell Pathway         Tissue Specificity       Aorta endothelial cell, Colon, Epithelium, Skeletal muscle,         Function       function: May be involved in apoptosis., similarity: Contains 1 CARD domain.,         Background       This gene encodes a protein that contains a caspase recruitment domain (CARD), an antiparallel six-helical bundle that mediates homotypic protein-protein interactions. The encoded protein is a microtubule-associated protein that has been shown to interact with receptor-interacting protein kinases and positively modulate signal transduction pathways converging on activation of the inducible	Purification	·
Purity ≥90%  Storage Stability -20°C/1 year  Synonyms CARD6; Caspase recruitment domain-containing protein 6  Observed Band 116kD  Cell Pathway  Tissue Specificity Aorta endothelial cell,Colon,Epithelium,Skeletal muscle,  function function:May be involved in apoptosis.,similarity:Contains 1 CARD domain.,  Background This gene encodes a protein that contains a caspase recruitment domain (CARD), an antiparallel six-helical bundle that mediates homotypic protein-protein interactions. The encoded protein is a microtubule-associated protein that has been shown to interact with receptor-interacting protein kinases and positively modulate signal transduction pathways converging on activation of the inducible	Dilution	WB 1:500-2000
Storage Stability  -20°C/1 year  Synonyms  CARD6; Caspase recruitment domain-containing protein 6  Observed Band  116kD  Cell Pathway  Tissue Specificity  Aorta endothelial cell,Colon,Epithelium,Skeletal muscle,  function  function:May be involved in apoptosis.,similarity:Contains 1 CARD domain.,  This gene encodes a protein that contains a caspase recruitment domain (CARD), an antiparallel six-helical bundle that mediates homotypic protein-protein interactions. The encoded protein is a microtubule-associated protein that has been shown to interact with receptor-interacting protein kinases and positively modulate signal transduction pathways converging on activation of the inducible	Concentration	1 mg/ml
Synonyms  CARD6; Caspase recruitment domain-containing protein 6  Observed Band  116kD  Cell Pathway  Tissue Specificity  Aorta endothelial cell,Colon,Epithelium,Skeletal muscle,  function  function:May be involved in apoptosis.,similarity:Contains 1 CARD domain.,  Background  This gene encodes a protein that contains a caspase recruitment domain (CARD), an antiparallel six-helical bundle that mediates homotypic protein-protein interactions. The encoded protein is a microtubule-associated protein that has been shown to interact with receptor-interacting protein kinases and positively modulate signal transduction pathways converging on activation of the inducible	Purity	≥90%
Observed Band  Cell Pathway  Tissue Specificity  Aorta endothelial cell,Colon,Epithelium,Skeletal muscle,  function  function:May be involved in apoptosis.,similarity:Contains 1 CARD domain.,  Background  This gene encodes a protein that contains a caspase recruitment domain (CARD), an antiparallel six-helical bundle that mediates homotypic protein-protein interactions. The encoded protein is a microtubule-associated protein that has been shown to interact with receptor-interacting protein kinases and positively modulate signal transduction pathways converging on activation of the inducible	Storage Stability	-20°C/1 year
Cell Pathway  Tissue Specificity  Aorta endothelial cell,Colon,Epithelium,Skeletal muscle,  function  function:May be involved in apoptosis.,similarity:Contains 1 CARD domain.,  This gene encodes a protein that contains a caspase recruitment domain (CARD), an antiparallel six-helical bundle that mediates homotypic protein-protein interactions. The encoded protein is a microtubule-associated protein that has been shown to interact with receptor-interacting protein kinases and positively modulate signal transduction pathways converging on activation of the inducible	Synonyms	CARD6; Caspase recruitment domain-containing protein 6
Tissue Specificity  Aorta endothelial cell,Colon,Epithelium,Skeletal muscle,  function  function:May be involved in apoptosis.,similarity:Contains 1 CARD domain.,  This gene encodes a protein that contains a caspase recruitment domain (CARD), an antiparallel six-helical bundle that mediates homotypic protein-protein interactions. The encoded protein is a microtubule-associated protein that has been shown to interact with receptor-interacting protein kinases and positively modulate signal transduction pathways converging on activation of the inducible	Observed Band	116kD
Function  function:May be involved in apoptosis.,similarity:Contains 1 CARD domain.,  This gene encodes a protein that contains a caspase recruitment domain (CARD), an antiparallel six-helical bundle that mediates homotypic protein-protein interactions. The encoded protein is a microtubule-associated protein that has been shown to interact with receptor-interacting protein kinases and positively modulate signal transduction pathways converging on activation of the inducible	Cell Pathway	
Background  This gene encodes a protein that contains a caspase recruitment domain (CARD), an antiparallel six-helical bundle that mediates homotypic protein-protein interactions. The encoded protein is a microtubule-associated protein that has been shown to interact with receptor-interacting protein kinases and positively modulate signal transduction pathways converging on activation of the inducible	Tissue Specificity	Aorta endothelial cell,Colon,Epithelium,Skeletal muscle,
(CARD), an antiparallel six-helical bundle that mediates homotypic protein-protein interactions. The encoded protein is a microtubule-associated protein that has been shown to interact with receptor-interacting protein kinases and positively modulate signal transduction pathways converging on activation of the inducible	Function	function: May be involved in apoptosis., similarity: Contains 1 CARD domain.,
	Background	(CARD), an antiparallel six-helical bundle that mediates homotypic protein-protein interactions. The encoded protein is a microtubule-associated protein that has been shown to interact with receptor-interacting protein kinases and positively modulate signal transduction pathways converging on activation of the inducible
