Cell Pathway	Membrane ; Single-pass type II membrane protein . Golgi apparatus, trans-Golgi network membrane . Endosome membrane . Cell projection, dendrite . Early endosome membrane . Late endosome membrane . Lysosome lumen . Recycling endosome membrane . Cytoplasmic vesicle membrane . Golgi apparatus, Golgi stack membrane . Endosome, multivesicular body membrane . Endoplasmic reticulum membrane . Endocytosed from the cell surface, thus enters into early endosomes, trafficks to late endosomes and degrades in lysosomes (By similarity). Endoplasmic reticulum targeting is essential for apoptosis (PubMed:20599942). Found in both stationary and motile endosomes. A previous study supports a type I membrane protein topology (By similarity). .
