

Patched Monoclonal Antibody

Catalog No	BYmab-13656
Isotype	IgG
Reactivity	Human;Mouse
Applications	WB
Gene Name	PTCH1
Protein Name	Protein patched homolog 1
Immunogen	The antiserum was produced against synthesized peptide derived from human Patched. AA range:1-50
Specificity	Patched Monoclonal Antibody detects endogenous levels of Patched protein.
Formulation	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.
Source	Monoclonal, Mouse,IgG
Purification	The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen.
Dilution	WB 1:500-2000
Concentration	1 mg/ml
Concentration Purity	1 mg/ml ≥90%
Purity	≥90%
Purity Storage Stability	≥90% -20°C/1 year
Purity Storage Stability Synonyms	≥90% -20°C/1 year PTCH1; PTCH; Protein patched homolog 1; PTC; PTC1
Purity Storage Stability Synonyms Observed Band	≥90% -20°C/1 year PTCH1; PTCH; Protein patched homolog 1; PTC; PTC1 160kD

PTCH1 is also mutated in squamo

Background	This gene encodes a member of the patched gene family. The encoded protein is the receptor for sonic hedgehog, a secreted molecule implicated in the formation of embryonic structures and in tumorigenesis, as well as the desert hedgehog and indian hedgehog proteins. This gene functions as a tumor suppressor. Mutations of this gene have been associated with basal cell nevus syndrome, esophageal squamous cell carcinoma, trichoepitheliomas, transitional cell carcinomas of the bladder, as well as holoprosencephaly. Alternative splicing results in multiple transcribed, but their full length sequences and biological
	validity cannot be determined currently. [provided by RefSeq, Jul 2008],

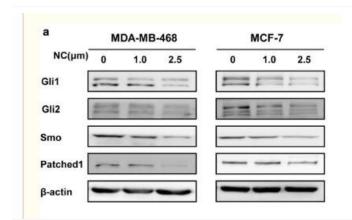

matters needing attention

Avoid repeated freezing and thawing!

Usage suggestions

This product can be used in immunological reaction related experiments. For more information, please consult technical personnel.
