

IL-4 Monoclonal Antibody

Stimulatory factor 1; Pitrakinra Observed Band 18kD Cell Pathway Secreted. Tissue Specificity Blood,PCR rescued clones,			
Reactivity Human;Mouse Applications WB Gene Name IL4 Protein Name Interleukin-4 Immunogen Synthesized peptide derived from the C-terminal region of human IL-4. Specificity IL-4 Monoclonal Antibody detects endogenous levels of IL-4 protein. Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Source Monoclonal, Mouse,IgG Purification The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-2000 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms IL4; Interleukin-4; IL-4; B-cell stimulatory factor 1; BSF-1; Binetrakin; Lymphostimulatory factor 1; Pitrakinra Observed Band 18kD Cell Pathway Secreted. Tissue Specificity Blood,PCR rescued clones,	Catalog No	BYmab-15937

Background

The protein encoded by this gene is a pleiotropic cytokine produced by activated T cells. This cytokine is a ligand for interleukin 4 receptor. The interleukin 4 receptor also binds to IL13, which may contribute to many overlapping functions of this cytokine and IL13. STAT6, a signal transducer and activator of transcription, has been shown to play a central role in mediating the immune regulatory signal of this cytokine. This gene, IL3, IL5, IL13, and CSF2 form a cytokine gene cluster on chromosome 5q, with this gene particularly close to IL13. This gene, IL13 and IL5 are found to be regulated coordinately by several long-range regulatory elements in an over 120 kilobase range on the chromosome. Two alternatively spliced transcript variants of this gene encoding distinct isoforms have been reported. [provided by RefSeq, Jul 2008],
