

GIMAP5 Monoclonal Antibody

Catalog No	BYmab-16165
Isotype	IgG
Reactivity	Human;Rat;Mouse;
Applications	WB
Gene Name	GIMAP5
Protein Name	GTPase IMAP family member 5
Immunogen	The antiserum was produced against synthesized peptide derived from human GIMAP5. AA range:231-280
Specificity	GIMAP5 Monoclonal Antibody detects endogenous levels of GIMAP5 protein.
Formulation	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.
Source	Monoclonal, Mouse,IgG
Purification	The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen.
Dilution	WB 1:500-2000
Concentration	1 mg/ml
Purity	≥90%
Storage Stability	-20°C/1 year
Synonyms	GIMAP5; IAN4L1; IAN5; IMAP3; GTPase IMAP family member 5; Immunity-associated nucleotide 4-like 1 protein; Immunity-associated nucleotide 5 protein; IAN-5; hIAN5; Immunity-associated protein 3
Observed Band	35kD
Cell Pathway	Lysosome membrane ; Single-pass type IV membrane protein . Endosome, multivesicular body membrane ; Single-pass type IV membrane protein . Endosome membrane ; Single-pass type IV membrane protein . The mitochondrial localization originally reported was observed with C-terminally tagged protein and was not confirmed in later publications. .
Tissue Specificity	Widely expressed with high levels in lymph node and spleen (PubMed:14724691). High expression found in T lymphocytes, including CD4 and CD8-positive T-cells, and monocytes (PubMed:14724691, PubMed:29382851). Very low expression levels in B-lymphocytes (PubMed:14724691).
Function	function:Required for mitochondrial integrity and T-cell survival. May contribute to T-cell quiescence.,similarity:Belongs to the IAN GTP-binding protein family.,tissue specificity:Widely expressed with high levels in lymph node and spleen. High

Nanjing BYabscience technology Co.,Ltd

expression found in CD4 and CD8-positive T-cells and monocytes with very low levels in B-lymphocytes. Highly expressed in B-lymphocyte-derived neoplasms.,

Background

This gene encodes a protein belonging to the GTP-binding superfamily and to the immuno-associated nucleotide (IAN) subfamily of nucleotide-binding proteins. In humans, the IAN subfamily genes are located in a cluster at 7q36.1. This gene encodes an antiapoptotic protein that functions in T-cell survival. Polymorphisms in this gene are associated with systemic lupus erythematosus. Read-through transcription exists between this gene and the neighboring upstream GIMAP1 (GTPase, IMAP family member 1) gene. [provided by RefSeq, Dec 2010],

matters needing attention

Avoid repeated freezing and thawing!

Usage suggestions

This product can be used in immunological reaction related experiments. For more information, please consult technical personnel.
