

Cdc16 Monoclonal Antibody

| Catalog No BYmab-16673 Isotype IgG Reactivity Human;Mouse;Rat Applications WB Gene Name CDC16 Protein Name Cell division cycle protein 16 homolog Immunogen The antiserum was produced against synthesized peptide derived from human APC6. AA range:181-230 Specificity Cdc16 Monoclonal Antibody detects endogenous levels of Cdc16 protein. Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Source Monoclonal, Mouse, IgG Purification The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-2000 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms CDC16; ANAPC6; Cell division cycle protein 16 homolog; Anaphase-promoting complex subunit 6; APC6; CDC16 homolog; CDC16Hs; Cyclosome subunit 6 Observed Band 72kD Cell Pathway Cytoplasm, cytoskeleton, microtubule organizing center, centrosome a. Cytoplasm, cytoskeleton, spindle. Colocalizes with CDC27 to the centrosome at all stages of the cell cycle and to the milotic spindle. Tissue Specif | | |

AA range:181-230 Specificity Cdc16 Monoclonal Antibody detects endogenous levels of Cdc16 protein. Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Source Monoclonal, Mouse,IgG Purification The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-2000 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms CDC16; ANAPC6; Cell division cycle protein 16 homolog; Anaphase-promoting complex subunit 6; APC6; CDC16 homolog; CDC16Hs; Cyclosome subunit 6 Observed Band 72kD Cell Pathway Cytoskeleton, microtubule organizing center, centrosome . Cytoplasm, cytoskeleton, spindle . Colocalizes with CDC27 to the centrosome at all stages of the cell cycle and to the mitotic spindle. Tissue Specificity Aorta endothelial cell, Brain, Epithelium, Lung, Skin, function: Component of the anaphase promoting complex/cyclosome (APC/C), a cell cycle-regulated ubiquitin ligase that controls progression through mitosis and the G1 phase of the cell cycle, pathway: Protein modification; protein ubiquitination. PTM: Phosphorylated. Phosphorylation on Ser-560 occurs specifically during mitosis, similarity; Belongs to the APC6/CDC16 family, similarity; Contains 7 TPR repeats, subucellural localion: Colocalizes with CDC27 to the centrosome at all stages of the cell cycle and to the mitotic spindle. Subunit: In he PAC/C is composed of at least 11 subunits. Interacts with | Catalog No | BYmab-16673 |

| Background | The protein encoded by this gene functions as a protein ubiquitin ligase and is a component of the multiprotein APC complex. The APC complex is a cyclin degradation system that governs exit from mitosis by targeting cell cycle proteins for degredation by the 26S proteasome. Each component protein of the APC complex is highly conserved among eukaryotic organisms. This protein, and other APC complex proteins, contain a tetratricopeptide repeat (TPR) domain; a protein domain that is often involved in protein-protein interactions and the assembly of multiprotein complexes. Multiple alternatively spliced transcript variants, encoding distinct proteins, have been identified. [provided by RefSeq, Jan 2016], |
