

## E-cadherin Monoclonal Antibody

| Catalog No         | BYmab-17017  |
|--------------------|--|
| lsotype            | lgG  |
| Reactivity         | Human;Mouse;Rat  |
| Applications       | WB   |
| Gene Name          | CDH1   |
| Protein Name       | Cadherin-1   |
| Immunogen          | The antiserum was produced against synthesized peptide derived from human Cadherin. AA range:833-882   |
| Specificity        | E-cadherin Monoclonal Antibody detects endogenous levels of E-cadherin<br>protein.   |
| Formulation        | Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.  |
| Source             | Monoclonal, Mouse,IgG  |
| Purification       | The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen.   |
| Dilution           | WB 1:500-2000  |
| Concentration      | 1 mg/ml  |
| Purity             | ≥90%   |
| Storage Stability  | -20°C/1 year   |
| Synonyms           | CDH1; CDHE; UVO; Cadherin-1; CAM 120/80; Epithelial cadherin; E-cadherin;<br>Uvomorulin; CD antigen CD324; CDH2; CDHN; NCAD; Cadherin-2; CDw325;<br>Neural cadherin; N-cadherin; CD antigen CD325; CDH3; CDHP; Cadherin-3;<br>Placental cadherin; P-cadhe  |
| Observed Band      | 125-130kD  |
| Cell Pathway       | Cell junction, adherens junction . Cell membrane ; Single-pass type I membrane protein. Endosome. Golgi apparatus, trans-Golgi network. Colocalizes with DLGAP5 at sites of cell-cell contact in intestinal epithelial cells. Anchored to actin microfilaments through association with alpha-, beta- and gamma-catenin. Sequential proteolysis induced by apoptosis or calcium influx, results in translocation from sites of cell-cell contact to the cytoplasm. Colocalizes with RAB11A endosomes during its transport from the Golgi apparatus to the plasma membrane. |
| Tissue Specificity | Non-neural epithelial tissues.   |

| Function                  | disease:Defects in CDH1 are a cause of gastric cancer [MIM:137215]; also known<br>as hereditary familial diffuse gastric cancer (HDGC).,disease:Defects in CDH1 are<br>a cause of susceptibility to endometrial cancer [MIM:608089].,disease:Defects in<br>CDH1 are associated with ovarian cancer [MIM:167000]. Ovarian cancer is the<br>leading cause of death from gynecologic malignancy. It is characterized by<br>advanced presentation with loco-regional dissemination in the peritoneal cavity<br>and the rare incidence of visceral metastases. These typical features relate to the<br>biology of the disease, which is a principal determinant of<br>outcome.,disease:Defects in CDH1 are involved in dysfunction of the cell-cell<br>adhesion system, triggering cancer invasion (gastric, breast, ovary, endometrium<br>and thyroid) and metastasis.,function:Cadherins are calcium dependent cell<br>adhesion proteins.,function:Cadherins are calcium |
|---------------------------|---|
| Background                | This gene encodes a classical cadherin of the cadherin superfamily. Alternative splicing results in multiple transcript variants, at least one of which encodes a preproprotein that is proteolytically processed to generate the mature glycoprotein. This calcium-dependent cell-cell adhesion protein is comprised of five extracellular cadherin repeats, a transmembrane region and a highly conserved cytoplasmic tail. Mutations in this gene are correlated with gastric, breast, colorectal, thyroid and ovarian cancer. Loss of function of this gene is thought to contribute to cancer progression by increasing proliferation, invasion, and/or metastasis. The ectodomain of this protein mediates bacterial adhesion to mammalian cells and the cytoplasmic domain is required for internalization. This gene is present in a gene cluster with other members of the cadherin family on chromosome 16. [provided by RefSeq, Nov 2015],                 |
| matters needing attention | Avoid repeated freezing and thawing!  |
| Usage suggestions         | This product can be used in immunological reaction related experiments. For more information, please consult technical personnel.   |
