

Nectin 3 Monoclonal Antibody

Catalog No	BYmab-17085
Isotype	IgG
Reactivity	Human;Mouse;Rat
Applications	WB
Gene Name	PVRL3
Protein Name	Poliovirus receptor-related protein 3
Immunogen	The antiserum was produced against synthesized peptide derived from the Internal region of human PVRL3. AA range:311-360
Specificity	Nectin 3 Monoclonal Antibody detects endogenous levels of Nectin 3 protein.
Formulation	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.
Source	Monoclonal, Mouse,IgG
Purification	The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen.
Dilution	WB 1:500-2000
Concentration	1 mg/ml
Purity	≥90%
Storage Stability	-20°C/1 year
Synonyms	PVRL3; PRR3; Poliovirus receptor-related protein 3; CDw113; Nectin-3; CD113
Observed Band	60kD
Cell Pathway	Cell membrane ; Single-pass membrane protein . Cell junction, synapse, postsynaptic cell membrane .
Tissue Specificity	Predominantly expressed in testis and placenta as well as in many cell lines, including epithelial cell lines.
Function	function:Plays a role in cell-cell adhesion through heterophilic trans-interactions with nectin-like proteins or nectins, such as trans-interaction with PVRL2/nectin-2 at Sertoli-spermatid junctions. Trans-interaction with PVR induces activation of CDC42 and RAC small G proteins through common signaling molecules such as SRC and RAP1. Also involved in the formation of cell-cell junctions, including adherens junctions and synapses. Induces endocytosis-mediated down-regulation of PVR from the cell surface, resulting in reduction of cell movement and proliferation. Plays a role in the morphology of the ciliary body.,similarity:Belongs to the nectin family.,similarity:Contains 1 Ig-like V-type (immunoglobulin-like) domain.,similarity:Contains 2 Ig-like C2-type (immunoglobulin-like) domains.,subunit:Cis- and trans-homodimer. Can form

Nanjing BYabscience technology Co.,Ltd

trans-heterodimers with PVRL1/nectin-1, PVRL2/nectin-2, PVR

Background

This gene encodes a member of the nectin family of proteins, which function as adhesion molecules at adherens junctions. This family member interacts with other nectin-like proteins and with afadin, a filamentous actin-binding protein involved in the regulation of directional motility, cell proliferation and survival. This gene plays a role in ocular development involving the ciliary body. Mutations in this gene are believed to result in congenital ocular defects. Alternative splicing results in multiple transcript variants. [provided by RefSeq, Aug 2011],

matters needing attention

Avoid repeated freezing and thawing!

Usage suggestions

This product can be used in immunological reaction related experiments. For more information, please consult technical personnel.
