| <b>Gene Name</b>                 | ZNF675 TIZ                                                                                                                                                                                                                                                         |
| <b>Protein Name</b>              | ZN675                                                                                                                                                                                                                                                              |
| <b>Immunogen</b>                 | Synthesized peptide derived from human ZN675 AA range: 66-116                                                                                                                                                                                                      |
| <b>Specificity</b>               | This antibody detects endogenous levels of ZN675 at Human                                                                                                                                                                                                          |
| <b>Formulation</b>               | Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.162% sodium azide.                                                                                                                                                                                           |
| <b>Source</b>                    | Polyclonal, Rabbit,IgG                                                                                                                                                                                                                                             |
| <b>Purification</b>              | The antibody was affinity-purified from rabbit serum by affinity-chromatography using specific immunogen.                                                                                                                                                          |
| <b>Dilution</b>                  | WB 1:500-2000                                                                                                                                                                                                                                                      |
| <b>Concentration</b>             | 1 mg/ml                                                                                                                                                                                                                                                            |
| <b>Purity</b>                    | ≥90%                                                                                                                                                                                                                                                               |
| <b>Storage Stability</b>         | -20°C/1 year                                                                                                                                                                                                                                                       |
| <b>Synonyms</b>                  | Zinc finger protein 675 (TRAF6-binding zinc finger protein) (TRAF6-inhibitory zinc finger protein)                                                                                                                                                                 |
| <b>Observed Band</b>             | 60kD                                                                                                                                                                                                                                                               |
| <b>Cell Pathway</b>              | Nucleus .                                                                                                                                                                                                                                                          |
| <b>Tissue Specificity</b>        | Spleen,Thymus,                                                                                                                                                                                                                                                     |
| <b>Function</b>                  | function:May be involved in transcriptional regulation. May play a role during osteoclast differentiation by modulating TRAF6 signaling activity.,similarity:Contains 1 KRAB domain.,similarity:Contains 15 C2H2-type zinc fingers.,subunit:Interacts with TRAF6., |
| <b>Background</b>                |                                                                                                                                                                                                                                                                    |
| <b>matters needing attention</b> | Avoid repeated freezing and thawing!                                                                                                                                                                                                                               |
