| <b>Cell Pathway</b>       | Cell membrane ; Multi-pass membrane protein . Endoplasmic reticulum membrane ; Multi-pass membrane protein .                                                                                                                                                                                                                                                                         |
| <b>Tissue Specificity</b> | Expressed in testis, pituitary gland, adrenal gland, trachea, placenta, thymus, cerebellum, stomach, mammary gland, spinal cord. A weaker expression is detected in colon, pancreas, and prostate.                                                                                                                                                                                   |
| <b>Function</b>           | developmental stage:Expressed in fetal kidney and lung.,function:Probable LCN1 receptor. May mediate LCN1 endocytosis.,similarity:Belongs to the LIMR family.,tissue specificity:Expressed in testis, pituitary gland, adrenal gland, trachea, placenta, thymus, cerebellum, stomach, mammary gland, spinal cord. A weaker expression is detected in colon, pancreas, and prostate., |
| <b>Background</b>         |                                                                                                                                                                                                                                                                                                                                                                                      |

#### matters needing attention

Avoid repeated freezing and thawing!

#### Usage suggestions

This product can be used in immunological reaction related experiments. For more information, please consult technical personnel.

## Products Images

Western blot analysis of lysates from A549 cells, primary antibody was diluted at 1:1000, 4° over night

Immunohistochemical analysis of paraffin-embedded human liver cancer. 1, Antibody was diluted at 1:200(4° overnight). 2, Tris-EDTA, pH9.0 was used for antigen retrieval. 3, Secondary antibody was diluted at 1:200(room temperature, 45min).
