| Observed Band             |                                                                                                                                                                                                      |
| Cell Pathway              | Membrane ; Multi-pass membrane protein .                                                                                                                                                             |
| Tissue Specificity        |                                                                                                                                                                                                      |
| Function                  | function:May be involved in signal transduction as a component of a multimeric receptor complex.,similarity:Belongs to the MS4A family.,                                                             |
| Background                | Most MS4A genes, including MS4A10, encode proteins with at least 4 potential transmembrane domains and N- and C-terminal cytoplasmic domains encoded by distinct exons.[supplied by OMIM, Apr 2004], |
| matters needing attention | Avoid repeated freezing and thawing!                                                                                                                                                                 |
| Usage suggestions         | This product can be used in immunological reaction related experiments. For more information, please consult technical personnel.                                                                    |
