

CDC27 Monoclonal Antibody

Anaphase-promoting complex subunit 3; APC3; CDC27 homolog; CDC27Hs; H-NUC Observed Band Cell Pathway Nucleus . Cytoplasm, cytoskeleton, spindle . Tissue Specificity Epithelium,Uterus, PTM:Phosphorylated. Phosphorylation on Ser-426 and Thr-446 occurs specifically during mitosis.,similarity:Belongs to the APC3/CDC27 family.,similarity:Contains 9 TPR repeats.,subunit:Interacts with RB., Background The protein encoded by this gene shares strong similarity with Saccharomyces cerevisiae protein Cdc27, and the gene product of Schizosaccharomyces pombe nuc 2. This protein is a component of the anaphase-promoting complex (APC), which is composed of eight protein subunits and is highly conserved in eukaryotic cells. This complex catalyzes the formation of cyclin B-ubiquitin conjugate, which		
Applications WB;IHC;IF;ELISA Gene Name CDC27 Protein Name Cell division cycle protein 27 homolog Immunogen Purified recombinant fragment of human CDC27 expressed in E. Coli. Specificity CDC27 Monoclonal Antibody detects endogenous levels of CDC27 protein. Formulation Ascitic fluid containing 0.03% sodium azide,0.5% BSA, 50%glycerol. Source Monoclonal, Mouse Purification Affinity purification Dilution WB: 1/500 - 1/2000. IHC: 1/200 - 1/1000. ELISA: 1/10000 IF 1:50-200 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms CDC27; ANAPC3; D0S1430E; D17S978E; Cell division cycle protein 27 homolog, Anaphase-promoting complex subunit 3; APC3; CDC27 homolog; CDC27Hs; H-NUC Observed Band Cell Pathway Nucleus. Cytoplasm, cytoskeleton, spindle. Tissue Specificity Epithelium,Uterus, Function PTM:Phosphorylated, Phosphorylation on Ser-426 and Thr-446 occurs specifically during mitosis, similarity:Belongs to the APC3/CDC27 family,-similarity:Contains 9 TPR repeats, subunit:Interacts with RB., The protein encoded by this gene shares strong similarity with Saccharomyces cerevisiae protein Cdc27, and the gene product of Schizosaccharomyces pombe nuc 2. This protein is a component of the anaphase-promoting complex (APC), which is composed of eight protein subunits and is highly correvel in eukaryotic cells. This complex catalyzes the formation of cyclin B-ubiquitin-mediated proteolysis of B-tycqcilias. The protein is responsible for the ubiquitin-mediated proteolysis of B-tycqcilias. The protein is responsible for the ubiquitin-mediated proteolysis of B-tycqcilias. The protein is responsible for the ubiquitin-mediated proteolysis of B-tycqcilias. The protein is responsible for the ubiquitin-mediated proteolysis of B-tycqcilias. The protein is responsible for the ubiquitin-mediated proteolysis of B-tycqcilias. The protein is a composed of catalyzes the formation of cyclin B-ubiquitin-mediated proteolysis of B-tycqcilias. The protein is a composed of catalyzes the formation of cyclin B-ubiq	Catalog No	BYab-16547
