

## TP53INP2 Monoclonal Antibody

Catalog No         BYmab-00583           Isotype         IgG           Reactivity         Human;Rat;Mouse;           Applications         WB           Gene Name         TP53INP2           Protein Name         Tumor protein p53-inducible nuclear protein 2           Immunogen         The antiserum was produced against synthesized peptide derived from the C-terminal region of human TP53INP2. AA range:161-210           Specificity         TP53INP2 Monoclonal Antibody detects endogenous levels of TP53INP2 protein.           Formulation         Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.           Source         Monoclonal, Mouse, IgG           Purification         The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen.           Dilution         WB 1:500-2000           Concentration         1 mg/ml           Purity         290%           Storage Stability         -20°C/1 year           Synonyms         TP53INP2; C20orf110; DOR; PINH; Tumor protein p53-inducible nuclear protein 2; Diabetes and obesity-regulated gene; p53-inducible protein U; PIG-U           Observed Band         24kD           Cell Pathway         Cytoplasm, cytosol. Nucleus, Nucleus, PML body. Cytoplasmic vesicle, autophagosome. Shuttles between the nucleus and the cytoplasm, depending on cellular stress conditions, and re-localizes to autophagoso		
Reactivity Human;Rat;Mouse;  Applications WB  Gene Name TP53INP2  Protein Name Tumor protein p53-inducible nuclear protein 2  Immunogen The antiserum was produced against synthesized peptide derived from the C-terminal region of human TP53INP2. AA range:161-210  Specificity TP53INP2 Monoclonal Antibody detects endogenous levels of TP53INP2 protein.  Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.  Source Monoclonal, Mouse, IgG  Purification The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen.  Dilution WB 1:500-2000  Concentration 1 mg/ml  Purity ≥90%  Storage Stability -20°C/1 year  Synonyms TP53INP2; C20orf110; DOR; PINH; Tumor protein p53-inducible nuclear protein 2; Diabetes and obesity-regulated gene; p53-inducible protein U; PIG-U  Observed Band 24kD  Cell Pathway Cytoplasm, cytosol, Nucleus, Nucleus, PML body. Cytoplasmic vesicle, autophagosome. Shuttles between the nucleus and the cytoplasm, depending on cellular stress conditions, and re-localizes to autophagosomes on autophagy activation.  Tissue Specificity Eye, Heart,  Function  Background tumor protein p53 inducible nuclear protein 2(TP53INP2) Homo sapiens The protein encoded by this gene promotes autophagy and is essential for proper autophagosome formation and processing, in addition, the encoded protein can enhance rDNA transcription by helping in the assembly of the POLAT;NANA polymerase I preinitiation complex. Finally, this protein encoded protein can enhance rDNA transcription by helping in the assembly of the POLAT;NANA polymerase I preinitiation complex. Finally, this protein encodes a transcription all	Catalog No	BYmab-00583
Applications  Gene Name  TP53INP2  Protein Name  Tumor protein p53-inducible nuclear protein 2  Immunogen  The antiserum was produced against synthesized peptide derived from the C-terminal region of human TP53INP2. AA range:161-210  Specificity  TP53INP2 Monoclonal Antibody detects endogenous levels of TP53INP2 protein.  Formulation  Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.  Source  Monoclonal, Mouse, IgG  Purification  The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen.  Dillution  WB 1:500-2000  Concentration  1 mg/ml  Purity  ≥90%  Storage Stability  -20°C/1 year  Synonyms  TP53INP2; C20orf110; DOR; PINH; Tumor protein p53-inducible nuclear protein 2; Diabetes and obesity-regulated gene; p53-inducible protein U; PIG-U  Observed Band  Cytoplasm, cytosol, Nucleus, Nucleus, PML body, Cytoplasmic vesicle, autophagosome. Shuttles between the nucleus and the cytoplasm, depending on cellular stress conditions, and re-localizes to autophagosomes on autophagy activation.  Tissue Specificity  Eye, Heart,  Function  Background  tumor protein p53 inducible nuclear protein 2(TP53INP2) Homo sapiens The protein encoded by this gene promotes autophagy and is essential for proper autophagosome formation and processing, in addition, the encoded protein can enhance rDNA transcription by helping in the assembly of the POLRTINAA polymerase I preinitiation complex. Finally, this protein serves as a transcriptional	Isotype	IgG
