

RNF138 Monoclonal Antibody

Catalog No BYmab-01987 Isotype IgG Reactivity Human;Mouse;Rat Applications WB Gene Name RNF138 Protein Name E3 ubiquitin-protein ligase RNF138 Immunogen The antiserum was produced against synthesized peptide derived from human RNF138. AA range:31-80 Specificity RNF138 Monoclonal Antibody detects endogenous levels of RNF138 protein. Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Source Monoclonal, Mouse, IgG Purification The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-2000 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms RNF138; NARF; HSD-4; HSD4; E3 ubiquitin-protein ligase RNF138; Nemo-like kinase-associated RING finger protein; NLK-associated RING finger protein; hNARF; RING finger protein 138 Observed Band 28kD Cell Pathway Chromosome. Recruited at DNA damage sites (PubMed:26502055). Localizes to sites of double-strand break localization to double-strand break sites is mediated by the zinc fingers; (PubMed:26502055). PubMed:26502057). <th></th> <th></th>		
Reactivity Human;Mouse;Rat Applications WB Gene Name RNF138 Protein Name E3 ubiquitin-protein ligase RNF138 Immunogen The antiserum was produced against synthesized peptide derived from human RNF138. Recruited at DNA damage sites (PubMed:26502055). Localizes to sites of double-strand break. localization to double-strand break sites is mediated by the zinc fingers (PubMed:26502055, PubMed:26502057). Tissue Specificity Placenta, Testis, Uterus, domain:The RING-type zinc finger domain mediates binding to an E2 ubiquitin-conjugating enzyme, function:E3 ubiquitin-protein ligase. Together with NLK, involved in the ubiquitination and degradation of TCF/LEF. Also exhibits auto-ubiquitination activity in combination with UBE2K. May act as a negative regulator in the Wnt/beta-catenin-mediated signaling pathway. Protein modification; protein ubiquitination and degradation of TCF/LEF. Also exhibits auto-ubiquitination activity in combination with UBE2K. May act as a negative regulator in the Wnt/beta-catenin-mediated signaling pathway. Protein modification; the Wnt/beta-catenin-mediated signaling pathway. Protein modification; probably by ATM or ATR, similarity: Combination RING-type	Isotype	IgG

Background	ring finger protein 138(RNF138) Homo sapiens The protein encoded by this gene contains a RING finger, a motif present in a variety of functionally distinct proteins and known to be involved in protein-DNA and protein-protein interactions. Alternatively spliced transcript variants encoding distinct isoforms have been observed. [provided by RefSeq, Jul 2008],
matters needing attention	Avoid repeated freezing and thawing!
Usage suggestions	This product can be used in immunological reaction related experiments. For more information, please consult technical personnel.
