

MAP-2 Monoclonal Antibody

of MAP2 is unknown but MAPs may stabilize the microtubules against depolymerization. They also seem to have a stiffening effect on microtubules.,PTM:MAP2A/c is phosphorylated. Phosphorylated upon DNA damage, probably by ATM or ATR.,similarity:Contains 3 Tau/MAP repeats.,similarity:Contains 4 Tau/MAP repeats., Background This gene encodes a protein that belongs to the microtubule-associated protein family. The proteins of this family are thought to be involved in microtubule assembly, which is an essential step in neurogenesis. The products of similar		
Reactivity Human; Mouse; Rat Applications WB Gene Name MAP2 Protein Name Microtubule-associated protein 2 Immunogen The antiserum was produced against synthesized peptide derived from human MAP-2. AA range: 14-63 Specificity MAP-2 Monoclonal Antibody detects endogenous levels of MAP-2 protein. Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Source Monoclonal, Mouse, IgG Purification The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-2000 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms MAP2; Microtubule-associated protein 2; MAP-2 Observed Band 280kD Cell Pathway Cytoplasm, cytoskeleton . Cell projection, dendrite . Tissue Specificity Brain, Brain cortex, Epithelium, Pancreas, Testis, Function alternative products: Additional isoforms seem to exist, function: The exact function of MAP2 is unknown but MAPs may stabilize the microtubules against depolymerization. They also seem to have a stiffening effect on microfubules, PTM: MAP2A/C is phosphorylated Phosphorylated upon DNA damage, probably by ATM or ATR, similarity: Contains 3 Tau/MAP repeats., similarity: Contains 3 Tau/MAP repeats. Background	Catalog No	BYmab-03147
