

Sideroflexin-4 Monoclonal Antibody

transmembrane protein of the inner mitochondrial membrane, and is required for mitochondrial respiratory homeostasis and erythropoiesis. Mutations in this gene		
Reactivity Human;Rat;Mouse; Applications WB Gene Name SFXN4 Protein Name Sideroflexin-4 Immunogen The antiserum was produced against synthesized peptide derived from human SFXN4. AA range:1-50 Specificity Sideroflexin-4 Monoclonal Antibody detects endogenous levels of Sideroflexin-4 protein. Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Source Monoclonal, Mouse,IgG Purification The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-2000 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms SFXN4; BCRM1; Sideroflexin-4; Breast cancer resistance marker 1 Observed Band 37kD Cell Pathway Mitochondrion inner membrane; Multi-pass membrane protein . Tissue Specificity Mammary tumor,Placenta,Tongue, Function function:Potential iron transporter.,similarity:Belongs to the sideroflexin family., This gene encodes a member of the sideroflexin family. The encoded protein is a transmembrane protein of the inner mitochondrial membrane, and is required for mitochondrial respirators have been found in this gene. [protody Precipies].	Catalog No	BYmab-04210
Applications WB Gene Name SFXN4 Protein Name Sideroflexin-4 Immunogen The antiserum was produced against synthesized peptide derived from human SFXN4. AA range:1-50 Specificity Sideroflexin-4 Monoclonal Antibody detects endogenous levels of Sideroflexin-4 protein. Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Source Monoclonal, Mouse, IgG Purification The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-2000 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms SFXN4; BCRM1; Sideroflexin-4; Breast cancer resistance marker 1 Observed Band 37kD Cell Pathway Mitochondrion inner membrane; Multi-pass membrane protein. Tissue Specificity Mammary tumor, Placenta, Tongue, Function function: Potential iron transporter., similarity: Belongs to the sideroflexin family., This gene encodes a member of the sideroflexin family. The encoded protein is a transmembrane protein of the inner mitochondrial membrane, and is required for mitochondrial respiratory homeostasis and erythropoiesis. Mutations in this gene associated with mitochondriopathy and macrocytic anemia. Altransively spliced transcript variants have been found in this gene. [provided by RefSeq, Jan	Isotype	IgG
Gene Name Protein Name Sideroflexin-4 Immunogen The antiserum was produced against synthesized peptide derived from human SFXN4. AA range:1-50 Specificity Sideroflexin-4 Monoclonal Antibody detects endogenous levels of Sideroflexin-4 protein. Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Source Monoclonal, Mouse,lgG Purification The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-2000 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms SFXN4; BCRM1; Sideroflexin-4; Breast cancer resistance marker 1 Observed Band 37kD Cell Pathway Mitochondrion inner membrane; Multi-pass membrane protein. Tissue Specificity Mammary tumor,Placenta,Tongue, Function This gene encodes a member of the sideroflexin family. The encoded protein is a transmembrane protein of the inner mitochondrial membrane, and is required for mitochondrial respiratory homeostasis and erythropolesis. Mutations in this gene are associated with mitochondriopathy and macrocytic anemia. Alternatively spliced transcript variants have been found in this gene, [provided by RefSeq, Jan	Reactivity	Human;Rat;Mouse;

Source Monoclonal, Mouse,IgG Purification The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-2000 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms SFXN4; BCRM1; Sideroflexin-4; Breast cancer resistance marker 1 Observed Band 37kD Cell Pathway Mitochondrion inner membrane; Multi-pass membrane protein. Tissue Specificity Mammary tumor,Placenta,Tongue, Function function:Potential iron transporter.,similarity:Belongs to the sideroflexin family., Background This gene encodes a member of the sideroflexin family. The encoded protein is a transmembrane protein of the inner mitochondrial membrane, and is required for mitochondrial respiratory homeostasis and erythropoiesis. Mutations in this gene are associated with mitochondriopathy and macrocytic anemia. Alternatively splaced transcript variants have been found in this gene. [provided by RefSeq, Jan	Specificity	Sideroflexin-4 Monoclonal Antibody detects endogenous levels of Sideroflexin-4 protein.
Purification The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-2000 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms SFXN4; BCRM1; Sideroflexin-4; Breast cancer resistance marker 1 Observed Band 37kD Cell Pathway Mitochondrion inner membrane; Multi-pass membrane protein. Tissue Specificity Mammary tumor,Placenta,Tongue, Function This gene encodes a member of the sideroflexin family. The encoded protein is a transmembrane protein of the inner mitochondrial membrane, and is required for mitochondrial respiratory homeostasis and erythropoiesis. Mutations in this gene are associated with mitochondriopathy and macrocytic anemia. Alternatively spliced transcript variants have been found in this gene. [provided by RefSeq, Jan	Formulation	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.
affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-2000 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms SFXN4; BCRM1; Sideroflexin-4; Breast cancer resistance marker 1 Observed Band 37kD Cell Pathway Mitochondrion inner membrane; Multi-pass membrane protein. Tissue Specificity Mammary tumor,Placenta,Tongue, Function function:Potential iron transporter.,similarity:Belongs to the sideroflexin family., Background This gene encodes a member of the sideroflexin family. The encoded protein is a transmembrane protein of the inner mitochondrial membrane, and is required for mitochondrial respiratory homeostasis and erythropoiesis. Mutations in this gene are associated with mitochondriopathy and macrocytic anemia. Alternatively spliced transcript variants have been found in this gene. [provided by RefSeq, Jan	Source	Monoclonal, Mouse,IgG
Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms SFXN4; BCRM1; Sideroflexin-4; Breast cancer resistance marker 1 Observed Band 37kD Cell Pathway Mitochondrion inner membrane; Multi-pass membrane protein. Tissue Specificity Mammary tumor, Placenta, Tongue, Function function:Potential iron transporter., similarity:Belongs to the sideroflexin family. Background This gene encodes a member of the sideroflexin family. The encoded protein is a transmembrane protein of the inner mitochondrial membrane, and is required for mitochondrial respiratory homeostasis and erythropoiesis. Mutations in this gene are associated with mitochondriopathy and macrocytic anemia. Alternatively spliced transcript variants have been found in this gene. [provided by RefSeq, Jan	Purification	•
Purity ≥90% Storage Stability -20°C/1 year Synonyms SFXN4; BCRM1; Sideroflexin-4; Breast cancer resistance marker 1 Observed Band 37kD Cell Pathway Mitochondrion inner membrane; Multi-pass membrane protein. Tissue Specificity Mammary tumor,Placenta,Tongue, Function function:Potential iron transporter.,similarity:Belongs to the sideroflexin family., Background This gene encodes a member of the sideroflexin family. The encoded protein is a transmembrane protein of the inner mitochondrial membrane, and is required for mitochondrial respiratory homeostasis and erythropoiesis. Mutations in this gene are associated with mitochondriopathy and macrocytic anemia. Alternatively spliced transcript variants have been found in this gene. [provided by RefSeq, Jan	Dilution	WB 1:500-2000
Storage Stability -20°C/1 year Synonyms SFXN4; BCRM1; Sideroflexin-4; Breast cancer resistance marker 1 Observed Band 37kD Cell Pathway Mitochondrion inner membrane; Multi-pass membrane protein. Tissue Specificity Mammary tumor,Placenta,Tongue, Function function:Potential iron transporter.,similarity:Belongs to the sideroflexin family., Background This gene encodes a member of the sideroflexin family. The encoded protein is a transmembrane protein of the inner mitochondrial membrane, and is required for mitochondrial respiratory homeostasis and erythropoiesis. Mutations in this gene are associated with mitochondriopathy and macrocytic anemia. Alternatively spliced transcript variants have been found in this gene. [provided by RefSeq, Jan	Concentration	1 mg/ml
Synonyms SFXN4; BCRM1; Sideroflexin-4; Breast cancer resistance marker 1 Observed Band 37kD Cell Pathway Mitochondrion inner membrane; Multi-pass membrane protein. Tissue Specificity Mammary tumor, Placenta, Tongue, Function function: Potential iron transporter., similarity: Belongs to the sideroflexin family., Background This gene encodes a member of the sideroflexin family. The encoded protein is a transmembrane protein of the inner mitochondrial membrane, and is required for mitochondrial respiratory homeostasis and erythropoiesis. Mutations in this gene are associated with mitochondriopathy and macrocytic anemia. Alternatively spliced transcript variants have been found in this gene. [provided by RefSeq, Jan	Purity	≥90%
Observed Band Cell Pathway Mitochondrion inner membrane; Multi-pass membrane protein. Tissue Specificity Mammary tumor,Placenta,Tongue, function:Potential iron transporter.,similarity:Belongs to the sideroflexin family., Background This gene encodes a member of the sideroflexin family. The encoded protein is a transmembrane protein of the inner mitochondrial membrane, and is required for mitochondrial respiratory homeostasis and erythropoiesis. Mutations in this gene are associated with mitochondriopathy and macrocytic anemia. Alternatively spliced transcript variants have been found in this gene. [provided by RefSeq, Jan	Storage Stability	-20°C/1 year
Cell Pathway Mitochondrion inner membrane; Multi-pass membrane protein. Tissue Specificity Mammary tumor, Placenta, Tongue, function function: Potential iron transporter., similarity: Belongs to the sideroflexin family., Background This gene encodes a member of the sideroflexin family. The encoded protein is a transmembrane protein of the inner mitochondrial membrane, and is required for mitochondrial respiratory homeostasis and erythropoiesis. Mutations in this gene are associated with mitochondriopathy and macrocytic anemia. Alternatively spliced transcript variants have been found in this gene. [provided by RefSeq, Jan	Synonyms	SFXN4; BCRM1; Sideroflexin-4; Breast cancer resistance marker 1
Tissue Specificity Mammary tumor,Placenta,Tongue, function function:Potential iron transporter.,similarity:Belongs to the sideroflexin family., This gene encodes a member of the sideroflexin family. The encoded protein is a transmembrane protein of the inner mitochondrial membrane, and is required for mitochondrial respiratory homeostasis and erythropoiesis. Mutations in this gene are associated with mitochondriopathy and macrocytic anemia. Alternatively spliced transcript variants have been found in this gene. [provided by RefSeq, Jan	Observed Band	37kD
Function function:Potential iron transporter.,similarity:Belongs to the sideroflexin family., Background This gene encodes a member of the sideroflexin family. The encoded protein is a transmembrane protein of the inner mitochondrial membrane, and is required for mitochondrial respiratory homeostasis and erythropoiesis. Mutations in this gene are associated with mitochondriopathy and macrocytic anemia. Alternatively spliced transcript variants have been found in this gene. [provided by RefSeq, Jan	Cell Pathway	Mitochondrion inner membrane ; Multi-pass membrane protein .
Background This gene encodes a member of the sideroflexin family. The encoded protein is a transmembrane protein of the inner mitochondrial membrane, and is required for mitochondrial respiratory homeostasis and erythropoiesis. Mutations in this gene are associated with mitochondriopathy and macrocytic anemia. Alternatively spliced transcript variants have been found in this gene. [provided by RefSeq, Jan	Tissue Specificity	Mammary tumor,Placenta,Tongue,
transmembrane protein of the inner mitochondrial membrane, and is required for mitochondrial respiratory homeostasis and erythropoiesis. Mutations in this gene are associated with mitochondriopathy and macrocytic anemia. Alternatively spliced transcript variants have been found in this gene. [provided by RefSeq, Jan	Function	function:Potential iron transporter.,similarity:Belongs to the sideroflexin family.,
	Background	mitochondrial respiratory homeostasis and erythropoiesis. Mutations in this gene are associated with mitochondriopathy and macrocytic anemia. Alternatively spliced transcript variants have been found in this gene. [provided by RefSeq, Jan
