CLLU1 mouse mAb

Catalog No	BYmab-11570
Isotype	IgG
Reactivity	Human;Rat;Mouse;
Applications	WB
Gene Name	CLLU1
Protein Name	CLLU1
Immunogen	Synthesized peptide derived from human CLLU1 AA range: 23-73
Specificity	This antibody detects endogenous levels of CLLU1 at Human
Formulation	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.
Source	Monoclonal, Mouse,IgG
Purification	The antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen.
Dilution	WB 1:500-2000
Concentration	1 mg/ml
Purity	≥90%
Storage Stability	-20°C/1 year
Synonyms	
Observed Band	
Cell Pathway	Cytoplasm . Detected in the cytoplasm of chronic lymphocytic leukemia (CLL) cells.
Tissue Specificity	Specifically expressed in chronic lymphocytic leukemia (CLL) cells from patients without immunoglobulin heavy-chain hypermutations. Expression is detected in all CLL cells and levels are similar in patients before and after treatment.
Function	disease:High CLLU1 expression in patients with CLL is associated with poor clinical outcome.,miscellaneous:Tridimensional modeling predicts that it may interact with the IL-4 receptor.,tissue specificity:Specifically expressed in chronic lymphocytic leukemia (CLL) cells from patients without immunoglobulin heavy-chain hypermutations.,
Background	The protein encoded by this gene is overexpressed in chronic lymphocytic leukemia (CLL) and serves as a good prognostic marker for the disease. Methylation of certain genes, including this one, have been associated with CLL. This gene is protein-coding in humans and non-protein coding in other primates. Three transcript variants, one protein-coding and the other two non-protein

Nanjing BYabscience technology Co.,Ltd

coding, have been found for this gene. [provided by RefSeq, Nov 2015],

matters needing attention	Avoid repeated freezing and thawing!
Usage suggestions	This product can be used in immunological reaction related experiments. For more information, please consult technical personnel.
