| <b>Tissue Specificity</b> | Blood,Brain,Chondrosarcoma,Endothelial cell,Hippocampus,Skin,Tongue,Uterus,                                                                                                                                                                                                                                                                                                                                                  |
| <b>Function</b>           | caution:The sequence shown here is derived from an Ensembl automatic analysis pipeline and should be considered as preliminary data.,function:May be involved in transcriptional regulation.,sequence caution:Contaminating sequence. Potential poly-A sequence.,similarity:Belongs to the krueppel C2H2-type zinc-finger protein family.,similarity:Contains 1 KRAB domain.,similarity:Contains 12 C2H2-type zinc fingers., |
| <b>Background</b>         | This gene encodes a protein containing a Kruppel-associated box domain and multiple zinc finger domains. This protein may play a role in developmental processes. Alternative splicing results in multiple transcript variants. [provided by RefSeq, Mar 2014],                                                                                                                                                              |

**Nanjing BYabscience technology Co.,Ltd**

**matters needing attention**

Avoid repeated freezing and thawing!

**Usage suggestions**

This product can be used in immunological reaction related experiments. For more information, please consult technical personnel.
