

POK17 rabbit pAb

Catalog No	BYab-24295
Isotype	IgG
Reactivity	Human;Rat;Mouse;
Applications	WB
Gene Name	
Protein Name	POK17
Immunogen	Synthesized peptide derived from human POK17 AA range: 351-401
Specificity	This antibody detects endogenous levels of POK17 at Human
Formulation	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.229% sodium azide.
Source	Polyclonal, Rabbit,IgG
Purification	The antibody was affinity-purified from rabbit serum by affinity-chromatography using specific immunogen.
Dilution	WB 1:500-2000
Concentration	1 mg/ml
Purity	≥90%
Storage Stability	-20°C/1 year
Synonyms	HERV-K_11q22.1 provirus ancestral Pol protein [Includes: Reverse transcriptase (RT) (EC 2.7.7.49); Ribonuclease H (RNase H) (EC 3.1.26.4); Integrase (IN)]
Observed Band	105kD
Cell Pathway	
Tissue Specificity	
Function	catalytic activity:Deoxynucleoside triphosphate + DNA(n) = diphosphate + DNA(n+1).,catalytic activity:Endonucleolytic cleavage to 5'-phosphomonoester.,domain:The LPQG and YXDD motifs are catalytically important and conserved among many retroviruses.,function:Early post-infection, the reverse transcriptase converts the viral RNA genome into double-stranded viral DNA. The RNase H domain of the reverse transcriptase performs two functions. It degrades the RNA template and specifically removes the RNA primer from the RNA/DNA hybrid. Following nuclear import, the integrase catalyzes the insertion of the linear, double-stranded viral DNA into the host cell chromosome. Endogenous Pol proteins may have kept, lost or modified their original function during evolution.,miscellaneous:Exact N-terminus of this protein has not been

Nanjing BYabscience technology Co.,Ltd

formally described.,miscellaneous:This protein is synthesized as Gag-Pr

Background

matters needing attention

Avoid repeated freezing and thawing!

Usage suggestions

This product can be used in immunological reaction related experiments. For more information, please consult technical personnel.
